

Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Conistone.

Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com

General Summary for Sunday, 1 November, 2026

British Mountain Summary:

Based on forecast chart for noon 1 November, 2026

A fine day for the Highlands, with sunshine and just patchy cloud around some tops. One or two light showers in northern areas. A weakening front drifts south over England & Wales giving cloudy skies and a little rain for a time, mainly more eastern hills. Light-moderate winds overall, but feeling chilly.

Headline for Lake District

Spots of rain, cloud banks, improving to sunny spells; fairly light wind.

Detailed Forecast for Sunday, 1 November, 2026

How windy? (On the summits)	North to northeasterly 15 to 20mph, tending to drop lighter during day.
Effect of wind on you?	Fairly small.
How wet? (Precipitation and its impact)	Some early dampness fades Pockets of drizzly rain in the morning mostly north and eastern Lakes, but fading out to be generally dry.
Cloud on the hills?	Low cloud increasingly clears Varied cloud banks around the hills in the morning, in places some fog to lower elevations, but tending to thin and break up, increasingly all clearing with time into middle of day and afternoon.
Chance of cloud free summits?	20% rising to 70% afternoon
Sunshine? Air clarity (below cloud)	Rather cloudy and misty around the fells in the morning, tending to improve with sun breaking through, soonest west; visibility becomes very good.
How Cold? (at 750m)	4 or 5C, slight drop during the day. Feeling near or just below 0C in the breeze on tops.
Freezing Level	Above the summits

Lake District - Looking Ahead

	Monday 2 November	Tuesday 3 November
How windy? (On the summits)	Northeasterly 15 to 20mph, rising slightly to 25mph at times mainly later in day.	East to northeasterly 20 to 25mph, some gusty areas 30mph around higher fells and some elevated passes.
Effect of wind on you?	Fairly small, but feeling chilly over exposed slopes and more noticeably breezy later.	Starting to affect comfortable walking on exposed terrain and some more noticeable gustiness affecting balance. Feeling chilly.
How wet? (Precipitation and its impact)	Rain not expected	A little drizzle Occasional patches of drizzle drifting in from the east, but most places often dry.
Cloud on the hills?	Capping some tops at times Patchy cloud may graze higher slopes mainly north/east areas from Skiddaw to High Street, well broken westward. Cloud likely to widely break for periods.	Capping some tops, but breaks likely Cloud banks drifting across some upper slopes mostly above 700m and mainly north and eastern fells from Skiddaw to High Street groups. Well broken westwards and may break fairly widely during day.
Chance of cloud free summits?	80%	50%
Sunshine? Air clarity (below cloud)	Patchwork of sun, best toward west. Visibility very good, some haze lower down.	Fairly cloudy, occasional sun breaking through, mostly western areas. Visibility very good.
How Cold? (at 750m)	2 to 4C. Feeling nearer -5C directly in wind.	5C, little change with added height. Feeling like -3C directly in the wind.
Freezing Level	Above the summits, but patchy frost in valleys at first, also some sheltered higher slopes.	Above the summits.

Planning Outlook

All mountain areas of Britain from Monday, 2 November, 2026

A settled start to November as high pressure resides toward the north. Largely dry weather throughout the week ahead. Variable cloud will be drawn in from the North Sea on easterly winds, at times some light showers mainly for Pennine areas. Best chance for inversion conditions will be on higher tops in Scotland, emerging above cloud at times. Sunshine typically best toward western coasts. Temperatures mostly above freezing on high terrain, but some frost overnight in glens and some upland hollows. Quiet weather may continue into next weekend, then a trend toward more unsettled conditions into mid-month, possibly colder patterns too.

Forecast issued at 16:00 on Saturday, 31 October, 2026
