Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com

General Summary for Friday, 6 November, 2026

British Mountain Summary:
Based on forecast chart for noon 6 November, 2026

Fairly light wind and scattered patches of light rain, amounting to little in total. Cloud base will vary, extensive on higher mountains, but lower down some slopes cloud free, whilst sometimes adjacent slopes remain foggy (or even between cloud layers) - with changes occurring only slowly.

Headline for Lake District

Fairly light wind. Extensive fog higher areas.

Detailed Forecast for Friday, 6 November, 2026

How windy? (On the summits)	Easterly, 20mph or in morning perhaps 25mph some higher areas. Will tend to ease through day.
Effect of wind on you?	**Fairly small**
How wet? (Precipitation and its impact)	**Pockets of rain, mainly eastern fells.** Most possibly all Cumbria dry. But pockets of very light rain may intermittently reach Cumbria - mainly more eastern and southern areas.
Cloud on the hills?	**Extensive, particularly more eastern hills** Broadly, cloud base will rise westwards and slowly through day, base typically 600 or 700m. However, mainly east Cumbria, areas of fog will 'hang' on lower slopes most or all day, whilst others are largely cloud free.
Chance of cloud free summits?	**20%**
Sunshine? Air clarity (below cloud)	Occasional sunshine, mainly or only west Cumbria. The air generally very clear, though misty in rain.
How Cold? (at 750m)	4C Will feel as cold as minus 3C directly in wind.
Freezing Level	Above the summits.

Lake District - Looking Ahead

	Saturday 7 November	Sunday 8 November
How windy? (On the summits)	Direction varied 10mph or less.	Generally northwesterly 10 to possibly 15mph.
Effect of wind on you?	**Negligible**	**Negligible**
How wet? (Precipitation and its impact)	**Patches of drizzly rain** Total rainfall small; nevertheless, particularly east Cumbria, drizzly rain may fall for an hour or two.	**Risk of a little drizzle, total rainfall small** Little change with a few further pockets of light or very light drizzle.
Cloud on the hills?	**Extensive fog.** Low cloud will affect much of region above 200-400m, although westwards the cloud base will tend to be above 450 and occasionally above 650m.	**Extensive; cloud base sometimes very different on nearby slopes** Detail uncertain: Cloud extensive or persistent above 700m. Lower down, fog clinging to many slopes from valleys up most or all day, whilst others are fog free or between layers of cloud. Generally least fog western fells.
Chance of cloud free summits?	**10%**	**10%**
Sunshine? Air clarity (below cloud)	Cloudy or dull and extensively misty or foggy.	Cloudy or dull with extensive fog - possibly brighter with glimpses of sun and very good visibility developing through day.
How Cold? (at 750m)	5C	4C
Freezing Level	Above the summits.	Above the summits.

Planning Outlook

All mountain areas of Britain from Saturday, 7 November, 2026

High pressure will continue to be the main influence into next week, particularly W & NW Highlands where extensively dry and wind often light. However, disappointing for other areas as 'gloomy' conditions predominate" patches of light rain and extensive low cloud and fog.
Into next week, an area of low pressure will bring rain and wind in from the southwest but northern Scotland may escape most or all the rain.

Forecast issued at 12:03 on Thursday, 5 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
