Lake District

The entire Lake District National Park, taking in all major summits, including Scafell, Helvellyn, Skiddaw, the Langdales and Old Man of Coniston.

Wheelwrights Cottages provide a wide range of self-catering accommodation around Langdale and beyond to suit all requirements. Please call us on 015394 37635 for details or go to www.wheelwrights.com

General Summary for Saturday, 7 November, 2026

British Mountain Summary:
Based on forecast chart for noon 7 November, 2026

Extensively cloudy and dull, some drizzle or light rain, but total amounts small. Areas of fog in places from low terrain upward and cloud banks across hills. Clearest hills generally further west, but limited sun. Generally light wind.

Headline for Lake District

A little drizzle and low cloud, some breaks west.

Detailed Forecast for Saturday, 7 November, 2026

How windy? (On the summits)	Easterly or variable 10mph or less.
Effect of wind on you?	**Negligible**
How wet? (Precipitation and its impact)	**Patches of drizzly rain** Total rainfall small, odd patches of fine drizzle, but particularly northeast Lakeland, drizzly rain likely fall for an hour or two.
Cloud on the hills?	**Extensive fog across the tops** Low cloud will affect much of region above 200-400m up to the summits, although westwards the cloud base above 650m, local breaks elsewhere mainly afternoon.
Chance of cloud free summits?	**20%**
Sunshine? Air clarity (below cloud)	Cloudy or dull and extensively misty or foggy.
How Cold? (at 750m)	5C
Freezing Level	Above the summits.

Lake District - Looking Ahead

	Sunday 8 November	Monday 9 November
How windy? (On the summits)	Variable 10mph or less.	Easterly 10mph, or less early in the day, rising a little to 10-15mph afternoon, or slightly stronger from dusk.
Effect of wind on you?	**Negligible**	**Small**
How wet? (Precipitation and its impact)	**Patchy drizzle** Local pockets of light or very light drizzle.	**No rain expected**
Cloud on the hills?	**Extensive; cloud base sometimes very different on nearby slopes** Some local variations, but cloud likely extensive or persistent above 700m. Lower down, fog clinging to many slopes from valleys up most or all day, whilst others are fog free or between layers of cloud. Generally least fog western fells.	**Varied low cloud, west may be clear** Some uncertainty, but cloud banks likely around high terrain, plus areas of fog in the valleys. Some slopes may be clearer between fog layers. May break up to be clearer overall toward western Lakeland.
Chance of cloud free summits?	**10%**	**40%**
Sunshine? Air clarity (below cloud)	Cloudy or dull with extensive fog - some areas brighter with glimpses of sun and very good visibility developing through day.	Mostly little sun, possibly breaking through on some west coastal fells more often with time. Generally hazy, or foggy, some local improvements in west.
How Cold? (at 750m)	4C	3C.
Freezing Level	Above the summits.	Above the summits, but patchy frost some inland valleys early morning.

Planning Outlook

All mountain areas of Britain from Sunday, 8 November, 2026

High pressure persists into the start of the new week with light winds for much of Scotland, though an easterly wind will increase for England and Wales. The west and northwest Highlands most extensively dry with cloud breaks and sun. However, disappointing for other areas as 'gloomy' conditions predominate, with patches of light rain and extensive low cloud and fog. Into midweek, an area of low pressure will bring rain and wind in from the southwest but northern Scotland may escape most or all the rain. Late in the week, indications favour a switch to a colder northerly flow for a time in Scotland at least and brings scope for snow showers to northern mountains.

Forecast issued at 8:05 on Saturday, 7 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
