Chance of cloud free summits?	90%
Sunshine? Air clarity (below cloud)	Sunshine and a little fair-weather cloud forming. Visibility very good, some early mist.
Temperature (at 600m)	9C rising to 12C
And in the valleys	Around 7C sheltered valleys at dawn; reaching 17 to 19C in the afternoon.

Peak District - Looking Ahead

	Tuesday 21 September	Wednesday 22 September
How windy? (On the summits)	Northwest becoming westerly, 10 to 15mph.	Southwesterly, 25mph, may reach 35mph for periods on highest terrain.
Effect of wind on you?	Mostly small	Expect blustery conditions throughout the day, walking sometimes arduous on higher tops and feeling cool where exposed.
How wet? (Precipitation and its impact)	Rain not expected	Probably little rain Much of the day may well stay dry, but a risk of patches of rain drifting onto western hills. Chance of becoming steadier rain developing from the north, mainly Lancashire Pennines.
Cloud on the hills?	Mostly very little Chance of cloud banks drifting onto western slopes around Manchester for a few hours.	Mostly clear, cloud may lower from north Most cloud above the hills much of the day, but banks may drift onto western tops for a time. If rain develops, cloud lowering across the Pennines mainly to the north of the Peak District.
Chance of cloud free summits?	80%	70%, dropping to 30% Lancs.
Sunshine? Air clarity (below cloud)	Sunshine and thin high level cloud. Visibility good, but a slight haze.	Fairly cloudy, some sun through high cloud, giving way to become overcast from north. Visibility generally very good, reduced if rain occurs.
Temperature (at 600m)	11 to 13C; hills warmer than valleys at first.	11 to 14C
And in the valleys	Around 7C at dawn, rising to 17 to 20C, warmest eastern Peak District.	Around 10C at dawn, reaching 18 to 20C by middle of day, warmest toward east.

Planning Outlook**All mountain areas of Britain from Tuesday, 21 September, 2021**

High pressure will drift southwards and southwesterly winds will strengthen across Britain in the first half of the week, soonest across Scotland. Staying windy through into next weekend, gales or sometimes severe gales on higher mountains, particularly Scotland. Rain will become frequent in western Scotland as fronts come in from the Atlantic. Spells of rain elsewhere - less wet for Wales and southern Pennines, although a risk of heavier rain moving further south by the weekend. Temperatures will vary through the next 10 days, sometimes fairly warm and humid, but chiller air spreading from the northwest at times - Scottish high tops occasionally near freezing point.

Forecast issued at 15:49 on Sunday, 19 September, 2021
