

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Wednesday, 18 May, 2022

British Mountain Summary:

Based on forecast chart for noon 18 May, 2022

Scotland - Scattered morning showers, then mostly dry with hazy sun in the afternoon. Low cloud lifting and mostly clearing by afternoon.
 England/Wales - Mostly dry with hazy sun and quite humid. Increasing risk of thundery rain later, first Wales and then elsewhere into evening.

Headline for Peak District

Mostly dry with hazy spells of sun. Risk thundery rain into evening.

Detailed Forecast for Wednesday, 18 May, 2022

How windy? (On the summits)	Southwest becoming southerly, steady increase through the day to 20 to 30mph.
Effect of wind on you?	Will increasingly impede walking across higher tops.
How wet? (Precipitation and its impact)	Mostly dry, thundery rain possible later. Very likely dry through the day. However, increasing risk into the evening of showery, perhaps thundery, rain developing.
Cloud on the hills?	Mostly very little Any early patches soon clearing. Then hills free of cloud through the day.
Chance of cloud free summits?	Greater than 90%
Sunshine? Air clarity (below cloud)	Hazy periods of sun, but often dense layers of high level cloud. Visibility good, but marked haze. Poor later in thundery rain.
Temperature (at 600m)	8C lifting to 12C
And in the valleys	Lifting to 18C, quite humid.

Peak District - Looking Ahead

	Thursday 19 May	Friday 20 May
How windy? (On the summits)	Southwesterly 10 to 20mph.	Southwesterly 15 to 25mph.
Effect of wind on you?	Small	Mostly small
How wet? (Precipitation and its impact)	Very likely dry Very likely dry through the day.	Showery rain developing into afternoon Mostly dry start, bar a few spots of rain here and there. Then increasingly showery bursts of rain developing into the afternoon, may set in for a few hours. Risk local thunder.
Cloud on the hills?	Very little Any early patches will soon disperse. Then hills clear.	Clear for several hours, forming in rain. Hills clear through morning and into start of afternoon. However, increasingly as rain develops, patches will form across the tops.
Chance of cloud free summits?	90%	80%
Sunshine? Air clarity (below cloud)	Periods of sunshine. Visibility very good.	Patches of sun, giving way to cloudy skies in the afternoon. Visibility very good, but lowering in rain later.
Temperature (at 600m)	10C	10C
And in the valleys	16 to 18C	15 to 17C

Planning Outlook**All mountain areas of Britain from Thursday, 19 May, 2022**

Generally southwesterly through the rest of the week, feeling rather cool on the mountains. Low cloud and pulses of rain will be concentrated across western Scotland, although some will spill in across England and Wales at times too, especially on Friday when some heavy thundery bursts may develop. Higher pressure building across England and Wales should bring fewer showers and some warmer, sunnier periods. High pressure over England and Wales over the weekend will afford mostly dry conditions here with some sunshine.
