Temperature (at 600m)	9 to 12C.	9 to 12C.
And in the valleys	8C at dawn, rising to 16C.	9C at dawn, rising to 15C.

Planning Outlook**All mountain areas of Britain from Saturday, 25 May, 2024**

Low pressure system will fade upon the weekend arrival, allowing for a short improvement in the weather on Saturday. Into Sunday, shallow low from the east brings a risk of worsening conditions in Scotland and northern England, while western areas will see a new cold front coming from the Atlantic bringing moist, unstable air and spells of rain or showers, continuing into Bank Holiday. With a series of fronts from the west, next week will likely stay changeable, with more cloudy and wet days than sunny spells.

Forecast issued at 16:22 on Thursday, 23 May, 2024

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
