Headline for Peak District

Murky but mostly dry, light winds, mild

Detailed Forecast for Saturday, 2 November, 2024

How windy? (On the summits)	Variable, mostly southeasterly, 5 to 15mph.
Effect of wind on you?	Negligible.
How wet? (Precipitation and its impact)	No rain expected
Cloud on the hills?	Extensive, may break, likeliest east Hills covered in cloud, most likely top to bottom in morning. Cloud slowly lifting to upper slopes, may partly break. Chance for breaks highest on the eastern slopes, but still most likely dull all day.
Chance of cloud free summits?	30%
Sunshine? Air clarity (below cloud)	Glimpses of sunshine, but generally cloudy. Very good visibility if not in cloud.
Temperature (at 600m)	Around 9C
And in the valleys	8 to 12C, rising only a little through the day.

Peak District - Looking Ahead

	Sunday 3 November	Monday 4 November
How windy? (On the summits)	Mostly south or southeasterly, 10 to 20mph.	Southeasterly, 15 to 20-25mph. At times may be complete lull.
Effect of wind on you?	Small.	Fairly small.
How wet? (Precipitation and its impact)	No rain expected	Rain unlikely Extensively dry, but chance drizzle here and there.
Cloud on the hills?	Varied cloud banks, increasing breaks Low cloud and fog in the valleys. Some banks of cloud drifting over higher moors, but in places some high tops clear or between cloud banks. May increasingly break up and clear.	Extensive, but may break up Confidence low: Cloud probably extensive above 500m from dawn and there may all be ribbons of fog on some lower slopes and in valleys. The cloud may partially or completely break up through the day. Additionally, patches of fog some lower
Chance of cloud free summits?	50%	50%
Sunshine? Air clarity (below cloud)	Plenty of sunshine and excellent visibility if cloud breaks up. Hazier or misty lower down in morning.	Cloud may well break to give extensive sunshine. Persistently hazy.
Temperature (at 600m)	8C	8C
And in the valleys	9C rising to 13C	Around 12C

Planning Outlook

All mountain areas of Britain from Sunday, 3 November, 2024

High pressure conditions for the weekend and beginning of next week. Inversion developing means often very misty or cloudy, but tops sometimes above cloud - especially the Munros. Southwesterly winds, dry and mild conditions. Such scheme holds until Tuesday afternoon, when a weak front passage will deteriorate weather for a day along the western coastal mountains especially. Later another few days of often cloudy, but dry and even warmer weather. Winds may speed up again end of next week. During the weekend, more often wet conditions are likely, but at this stage uncertainty is still fairly high.

Forecast issued at 16:25 on Friday, 1 November, 2024

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
