

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Tuesday, 17 June, 2025

British Mountain Summary: Based on forecast chart for noon 17 June, 2025

A weakening front drifts slowly southwards, bringing low cloud and rain or drizzle, soon fading from most of the Highlands where cloud bases rise, but damp conditions lingering for the Lakes, only fading gradually later. Drizzly rain extends into north Wales. Moderate southwesterly breezes, but stronger at dawn.

Headline for Peak District

Breezy on tops. Largely dry, a little drizzle later northwest.

Detailed Forecast for Tuesday, 17 June, 2025

How windy? (On the summits)	West to southwesterly 20mph, up to 25 or 30mph for a time early in day.
Effect of wind on you?	Fairly small, but feeling breezy over higher terrain, may start to affect comfortable walking early morning.
How wet? (Precipitation and its impact)	Possible light rain northwest A weakening front coming in from north may bring drizzly showers to western hills, mainly areas north from Bleaklow during afternoon.
Cloud on the hills?	Little if any Generally above the hills, some patchy cloud may drift onto western higher slopes if rain develops.
Chance of cloud free summits?	90%

Planning Outlook

All mountain areas of Britain from Wednesday, 18 June, 2025

High pressure to the south will to expand northwards during midweek, with dry conditions and very warm air extending north to all regions for the second half of the week, sunshine and fair-weather cloud. Winds becoming light south to southeasterlies. Some uncertainty, fine weather may continue for most places through the weekend into early next week, but risk some showers with time.
