

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Monday, 30 June, 2025

British Mountain Summary:

Based on forecast chart for noon 30 June, 2025

Very warm and humid. Gale force southerly winds for NW Scotland at first will ease, but gusty winds strengthen elsewhere. As a front encroaches from the west across the Highlands, bursts of rain will merge into a swathe of more extensive heavy rain, possible thunder. Dry with sunshine for England and Wales, small risk local showers.

Headline for Peak District

Hot and mostly sunny. Increasingly breezy.

Detailed Forecast for Monday, 30 June, 2025

How windy? (On the summits)	Southerly 15 to 20mph, strengthening later in day to 25-30mph, becoming gusty, turning southwesterly by evening.
Effect of wind on you?	Fairly small, feeling blustery in places, particularly later.
How wet? (Precipitation and its impact)	Very likely dry Most likely all day dry, but toward evening, small chance of very isolated thundery bursts of rain forming.
Cloud on the hills?	Clear most or all day Any early mist patches soon clearing.
Chance of cloud free summits?	Practically certain
Sunshine? Air clarity (below cloud)	Sunshine and some thin high cloud. Early mist or haze thins to leave very good visibility.
Temperature (at 600m)	18C rising to 23C; very humid.
And in the valleys	Muggy 16C from dawn, soon above 20C early morning, rising to 29C afternoon.

Peak District - Looking Ahead

	Tuesday 1 July	Wednesday 2 July
How windy? (On the summits)	Southwesterly or variable 10 to 15mph or less.	Direction variable 10 to 15mph.
Effect of wind on you?	Small	Small
How wet? (Precipitation and its impact)	Possibly bursts of rain later Much of the day likely dry. Risk of local showers forming, possibly isolated slow-moving thundery bursts later.	Possible patchy rain or showers Risk occasional rain, may be just spots from high cloud. Low risk of developing into heavier showers or locally more frequent rain.
Cloud on the hills?	Mostly clear Most cloud above the hills. Possible early mist patches. Locally if showers occur, cloud banks may form over some slopes.	Likely very little Uncertain: There may be very little cloud covering the hills all day. Small risk if rain develops that cloud may widely lower.
Chance of cloud free summits?	80%	70%
Sunshine? Air clarity (below cloud)	Fairly cloudy, glimpses of sun. Visibility good, slight haze.	Areas of high cloud may often cover the sky, a little weak sun. Visibility good, though may be dull for periods.
Temperature (at 600m)	13 to 16C, still quite humid.	10 to 13C.
And in the valleys	Humid 16C from dawn, rising to 22C.	12C at dawn, rising to 19C afternoon.

Planning Outlook

All mountain areas of Britain from Tuesday, 1 July, 2025

Cooler across Scotland by Monday night as a cold front advances eastwards. Risk of scattered thundery showers Tuesday-Wednesday, mostly eastern areas. High pressure then builds to the south, whilst a humid southwesterly returns to bring spells of rain and low cloud to western Scotland. The second week of July looks cooler for all with sunshine and showers.

Forecast issued at 16:00 on Sunday, 29 June, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
