Cloud on the hills?	Tops soon cloud-free Patchy banks over tops at dawn soon lift above the summits.
Chance of cloud free summits?	Above 90%
Sunshine? Air clarity (below cloud)	Often sunny, fair weather cloud building afternoon. Excellent visibility.
Temperature (at 600m)	9C rising to 13C, locally warmer on south/eastern slopes. Feeling like 3C in the wind in morning, 6C by afternoon.
And in the valleys	9C at dawn rising to 17C.

Peak District - Looking Ahead

	Tuesday 8 July	Wednesday 9 July
How windy? (On the summits) Effect of wind on you?	Northwesterly 15-20mph. Gradually shifting westerly and easing to 15mph. Toward evening increasing again. Some impeding winds in the morning will ease for fairly small impact.	Westerly 10 to 15mph, occasional 20mph in morning. Mostly small.
How wet? (Precipitation and its impact)	Little or no rain Small chance local spots of drizzly rain late in the day. May be entirely dry.	Possible early drizzle Local pockets of drizzle in the morning, fading out.
Cloud on the hills? Chance of cloud free summits?	Hills cloud-free after morning Patchy banks of cloud drift around high edges early, soon lifting off the summits. Above 90% most of the day	Early low cloud, clearing into afternoon Low cloud covering the hills fairly widely early in day, base around 400-500m or locally lower in west for a time. Lifting and breaking toward higher moors, then largely clearing by afternoon. 20% early, rising to 90% afternoon.
Sunshine? Air clarity (below cloud)	Extensive morning sunshine, high cloud gradually building through afternoon. Excellent visibility.	Mostly cloudy morning, sun breaking through, increasingly sunnier afternoon-evening. Visibility becoming very good.
Temperature (at 600m) And in the valleys	9C at dawn, rising to 14C, warmest on eastern slopes. 9C at dawn, rising to 17 or 18C	13C rising to 17C afternoon, humid. 11C at dawn, rising to 22C afternoon.

Planning Outlook

All mountain areas of Britain from Tuesday, 8 July, 2025

Low pressure to the northwest maintains a humid southwesterly wind mid-late this week, with fronts situated near northwestern coasts - often extensive low cloud here with some drizzly rain. Drier with sun and broken cloud in east and southern Scotland. High pressure expanding over England and Wales brings more sunshine and draws in increasingly very warm air again in the later part of this week, higher temperatures extending into Scotland with time; some mist may continue to affect coasts in the west.

Forecast issued at 16:00 on Sunday, 6 July, 2025
