

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Thursday, 18 September, 2025

British Mountain Summary:

Based on forecast chart for noon 18 September, 2025

Strong upland wind or gales across the mountains. Frontal wave bringing persistent, heavy rain and extensive cloud from North Wales to the Southern Uplands. Highlands drier, especially east of A9, but showery near the west and north-west coast in the morning. Temperatures mild but with notable wind chill.

Headline for Peak District

Strong upland wind, rain on and off, widespread cloud

Detailed Forecast for Thursday, 18 September, 2025

How windy? (On the summits)	Southwesterly 30 to 40mph. Gusty.
Effect of wind on you?	Arduous walking conditions. Gusts will affect your balance and may blow you over. Marked wind chill.
How wet? (Precipitation and its impact)	Rain on and off, most frequent morning Periods of mostly light, but occasionally heavy, rain interspaced with drier periods. Most likely in the morning, but risk remains all day.
Cloud on the hills?	Widespread Widespread cloud on high ground becoming temporarily more extensive during and after rain.
Chance of cloud free summits?	20%
Sunshine? Air clarity (below cloud)	Little or no sunshine. Excellent visibility when below cloud deck.
Temperature (at 600m)	15C. Feeling as cold as 5C in the wind.
And in the valleys	10 to 12C rising to 17 to 20C.

All mountain areas of Britain from Friday, 19 September, 2025

Weather remains mixed into and through the weekend, often with high winds, regions of persistent rain and extensive cloud. Temperatures falling through Saturday across the UK with the higher Scottish summits dropping below freezing and frosts in some glens. Looking increasingly likely that high pressure will take hold from the north on Sunday evening, bringing a period of more settled weather across the country for a couple of days at least, perhaps longer.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
