MOUNTAIN WEATHER INFORMATION SERVICE

Peak District

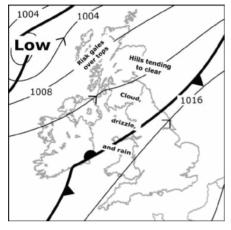

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Friday, 19 September, 2025

British Mountain Summary: Based on forecast chart for noon 19 September, 2025

Mostly dry and blustery for Scottish Highlands; cloud, some showers, and risk of gales on west coast tops. Persistent cloud and rain for southern Scotland, north England, and north Wales with a similar risk of gales on highest tops. Rain more patchy south Pennines and south Wales, some cloud breaks to inland summits.

Headline for Peak District

Patchy rain and drizzle, mostly north; some cloud breaks

Detailed Forecast for Friday, 19 September, 2025

How windy? (On the	Southwesterly 25 to 30mph, some stronger breezes in the morning.		
summits)			
Effect of wind on you?	Ease of walking affected in places where exposed on tops and near edges, particularly early. Feeling cool.		
How wet?	Risk of patchy rain and drizzle, mostly north		
(Precipitation and its impact)	Drizzly at times over high moors, particularly those near and north of M62. A few odd patches of rain will drift around as well. Southern moors may remain substantially dry.		
Cloud on the hills?	Widespread higher areas most of the day		
	From dawn, widely foggy from middle slopes upward. Cloud bases tending to rise slightly through afternoon, most terrain above 500-600m remaining in cloud until late in the day when southeast tops may see breaks.		
Chance of cloud free summits?	10%, rising to 40% southern moors		
Sunshine? Air clarity (below cloud)	Only some patchy sunshine through high cloud in the south, otherwise overcast. Poor visibility northwest, better further east and south, good below cloud.		
Temperature (at	14C rising to 16C.		
600m)	Feeling near 7C where directly exposed to wind.		
And in the valleys	15C from dawn, rising towards 19 or 20C, likely warmest southeast. Quite humid.

Peak District - Looking Ahead

	Saturday 20 September	Sunday 21 September
How windy? (On the summits) Effect of wind on	Forecast details uncertain. Variable 10-20mph, trending SW'ly later and rising to 25-35mph, stronger overnight. Negligible initially but comfort of	Northerly 35-45mph. Tending to ease somewhat afternoon and shift northwesterly. Arduous most of the day, though some
you?	walking increasingly affected afternoon, further deteriorating. Marked wind chill.	improvement in the afternoon. Significant wind chill.
How wet? (Precipitation and its impact)	Rain on and off, heavy at times	Morning rain, then some showers
	Rain on and off, occasionally setting in for hours at a time. Risk of some longer, heavier areas of rain into evening and overnight.	Rain from dawn gradually breaks and passes east through morning. Showers follow the rain.
Cloud on the hills?	Likely widespread	Likely clear
	Cloud likely to be widespread on high ground and possibly come down to mid-slopes, or even lower slopes, where rain occurs.	Patchy cloud on high tops in the morning with some odd banks onto middle slopes; cloud will lift and break for clear moors.
Chance of cloud free summits?	30%	90%
Sunshine? Air clarity (below cloud)	Sunshine unlikely. Poor visibility.	Cloudy for much of the day, some weak sunshine increasingly appearing afternoon.
Temperature (at 600m)	10 to 12C, dropping a little into the afternoon. Feeling between 0 and 5C in the afternoon wind.	4C rising to 7C, possibly warmer in the morning - detail uncertain. Feeling near -8C in direct wind.
And in the valleys	13C rising to 16C through the day.	6C from dawn, rising to 11C. Some chance of warmer temperatures from dawn.

Planning Outlook

All mountain areas of Britain from Saturday, 20 September, 2025

An unsettled weekend ahead as low pressure brings heavy rain to England and southern Scotland on Saturday with strong winds. Conditions increasingly wet underfoot with streams in spate - some flooding is likely. A northerly wind in Scotland begins to draw unseasonably cold air into the Highlands, bringing freezing levels down to high terrain. Cold air flows into into England and Wales through Sunday on a strong wind - wind chills in direct exposure may reach as low as -10 to -15C.

Some showers into northern Scotland on Monday will fade for a substantially dry week ahead with good sunny breaks for many. Temperatures staying cool but slowing rising day-by-day.

Forecast issued at 16:30 on Thursday, 18 September, 2025
