All mountain areas of Britain from Wednesday, 22 October, 2025

A complex weather situation through midweek, with various centres of low pressure drifting around slowly. Areas of rain and showers, but also drier moments - Wednesday and possibly Thursday often dry in eastern Scotland and northern England - beware of a deterioration from the northwest during Thursday with gales and rain setting in . Significantly colder later in the week as winds turn northerly. Freezing level dropping to 800-1000m into the weekend, lowest in northern Scotland. A mix of sunshine and showers falling as snow on high terrain , most frequent in north-facing areas.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
