

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Saturday, 15 November, 2025

British Mountain Summary:

Based on forecast chart for noon 15 November, 2025

High fog banks in the east Scottish Highlands, dry with sunshine west; windy early but easing. A thin layer of snow blankets the summits. Early gales in England and north Wales ease but remaining blustery. Rain here too, also easing though lingering south Pennines. Flood risk in Wales and south Pennines.

Headline for Peak District

Flood risk, rain slowly easing afternoon; gales, easing somewhat

Detailed Forecast for Saturday, 15 November, 2025

How windy? (On the summits)	Easterly 50mph from dawn, powerful gusts near edges and locally downslope. Slowly decreasing, to 35mph with gusts remaining strong, further easing from dusk.
Effect of wind on you?	Difficult walking, turbulent gusts on some slopes, particularly in morning, will require bracing for stability. Lessening somewhat but conditions remain strenuous-to-arduous with considerable buffeting.
How wet? (Precipitation and its impact)	Rain slowly fading out; flooding Continuing rain from overnight for several hours after dawn. Intensity will start to ease and trend patchier afternoon, leaving just drizzly patches for dusk. Streams and rivers likely to be in flood.
Cloud on the hills?	Extensive Covering the hills fairly widely above 400-500m, perhaps rising a bit as rain eases. Ragged patches will reach lower slopes early in the day.
Chance of cloud free summits?	10%
Sunshine? Air clarity (below cloud)	Overcast. Visibility largely poor.
Temperature (at 600m)	4 or 5C. Wind chill feeling like -8C in exposure.
And in the valleys	6 or 7C, a slight rise.

All mountain areas of Britain from Sunday, 16 November, 2025

Rain eases in Wales and the southern Pennines though flood risk may linger for another day . Winds shift widely northerly as the weekend turns into next week, drawing cold air widely across the country; staying below freezing over higher mountains most likely throughout the next week to 10 days. Snow flurries move in on this northerly wind on slopes exposed to coasts; snow most frequent toward north of the Highlands with some locally more substantial accumulations over higher terrain; some accumulating upland snow possible more widely during Tuesday as a front drifts southward. Elsewhere, sunny breaks will occur at times frequent and prolonged. Winds often strong, at times gale force; significant wind chills likely.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
