

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Wednesday, 19 November, 2025

British Mountain Summary:

Based on forecast chart for noon 19 November, 2025

Strong to gale-force northerly winds; severe chill factor on the mountains. Terrain widely frozen with fresh snow cover. Snow and hail showers frequent in the northern Highlands. Showers also north/west Wales. From the central Highlands into northern England, generally dry with sunshine and very clear air.

Headline for Peak District

Bitterly cold; wind to near-gale force. Soon mostly sunny.

Detailed Forecast for Wednesday, 19 November, 2025

How windy? (On the summits)	Northerly 35 to 40mph early in the day, easing a little to 25-30mph.
Effect of wind on you?	Challenging conditions early morning, remaining very blustery all day over tops, significant wind chill.
How wet? (Precipitation and its impact)	Daytime generally dry Areas of snow showers over the hills from overnight clearing south around or before dawn, then substantially dry, chance a rare flurry.
Cloud on the hills?	Lifting from hills Patchy cloud over some higher moors from dawn into early morning, but lifting and clearing above the hills.
Chance of cloud free summits?	70% rising above 90%
Sunshine? Air clarity (below cloud)	Some early cloud, but more sunshine with time, eastern areas may stay cloudier. Visibility soon generally excellent.
Temperature (at 600m)	-2C. Wind chill feeling like -15C in stronger speeds.
And in the valleys	Near/below freezing from dawn into morning and soon again from dusk. Reaching max 3 or 4C early afternoon.

Peak District - Looking Ahead

	Thursday 20 November	Friday 21 November
How windy? (On the summits) Effect of wind on you?	Northerly 25 to 40mph, speed may vary during day, risk strongest afternoon. Strenuous walking, at times challenging conditions on high terrain with significant wind chill.	Northwest turning westerly, 10 to 20mph, speed may vary, tending to increase into evening-night, eventually to 30mph. Mostly small during daytime, starting to deteriorate after dark.
How wet? (Precipitation and its impact)	Precipitation rare if any Chance of a snow flurry or shower coming in from the northeast, mainly later in daytime.	Precipitation unlikely until night Most likely all daytime dry. Into night, risk patchy rain developing from west, snow on higher terrain for a time.
Cloud on the hills? Chance of cloud free summits?	Hills clear Rare if any brief fragments on some higher slopes. 90%	Likely none Above 90%
Sunshine? Air clarity (below cloud)	Patchwork of cloud and bright sun, largely sunny western areas. Visibility excellent.	Sun through high cloud, tending to thicken from west later. Visibility excellent, possible mist or haze in some valleys.
Temperature (at 600m) And in the valleys	-1 or -2C. Wind chill feeling like -10C to nearer -15C in stronger speeds. Near freezing from dawn and soon again from dusk. Briefly up to max 4 or 5C early afternoon.	-1C, slight rise to around 0C afternoon, then +2C into night. Well below freezing around dawn, slow rise to 2 or 3C afternoon, but then little change or slight rise further into night.

Planning Outlook

All mountain areas of Britain from Thursday, 20 November, 2025

Prepare for winter conditions - snow covering many mountains to lower slopes in Scotland, snow and ice cover varied for England & Wales, but much terrain frozen; hard frosts into inland valleys and glens the next couple of nights. Continuing strong northerlies into Thursday, showery snow and hail gradually fading from northwest Scotland. A front moving into Scotland from the west on Friday brings gales and snow, turning to rain lower down - in England & Wales more likely develops Friday evening-night. Less cold into the weekend, but higher mountains stay near or just below freezing, particularly Scotland; showers or locally more frequent upland snow over several days forward.
