

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Sunday, 23 November, 2025

British Mountain Summary:

Based on forecast chart for noon 23 November, 2025

Low pressure will dominate the weather bringing areas of strong winds, rain (or snow on higher areas) and extensive fog to the hills - whiteout in places mainly southern Highlands. Windiest in Wales where upland gales will strengthen, whilst least windy S Scotland.

Headline for Peak District

Rain and fog; increasingly windy.

Detailed Forecast for Sunday, 23 November, 2025

How windy? (On the summits)	Westerly, 30 to 40mph; generally strongest afternoon.
Effect of wind on you?	Walking increasingly challenging - balance may well become difficult where exposed. Considerable wind chill.
How wet? (Precipitation and its impact)	Frequent rain Areas of rain circulating within low pressure, may set in for several hours, although one or two dry periods.
Cloud on the hills?	Very extensive Persistent fog most hills, widely above 400 to 600m, and sometimes covering lower slopes.
Chance of cloud free summits?	10%
Sunshine? Air clarity (below cloud)	Cloudy or dull; extensively foggy on the hills.
Temperature (at 600m)	3C. Will feel like -10C directly in the wind later in the day.
And in the valleys	7C

Peak District - Looking Ahead

	Monday 24 November	Tuesday 25 November
How windy? (On the summits)	Northerly, 30mph.	Northerly 25, perhaps 30mph at first; but easing toward 15mph.
Effect of wind on you?	Will impede ease of walking across the hills, and at times in gusty conditions, balance may be tricky and wind chill considerable.	Becoming small
How wet? (Precipitation and its impact)	Little or no rain A few bursts of showery rain, most likely more eastern areas.	Precipitation very unlikely
Cloud on the hills?	Mostly or all clearing Nearly all hills are likely to clear, although in the morning cloud extensively shrouding the hills. Gradually most or all summits clearing.	Very little if any
Chance of cloud free summits?	70% by afternoon	80%
Sunshine? Air clarity (below cloud)	Occasional sunshine, mainly more western areas gradually coming through. Visibility very good or perhaps in afternoon on more western areas excellent.	Bright sunshine. Excellent visibility.
Temperature (at 600m) And in the valleys	Around 3C - a marginal drop likely through the day Will feel as cold as minus 8C directly in Will reach 7 or 8C early afternoon.	2C Will rise to around 6C early afternoon. Frost many valleys morning.

Planning Outlook

All mountain areas of Britain from Monday, 24 November, 2025

After a brief burst of cold air on Monday and Tuesday winds will turn westerly. It will be milder with a week or more frequent rain and upland gales, particularly on western mountains. In Scotland, temperatures on the Munros will sometimes be below freezing point, but fresh snow transient, whereas elsewhere, snow rare, if any.
