

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Friday, 28 November, 2025

British Mountain Summary:

Based on forecast chart for noon 28 November, 2025

Stormy conditions over Scottish mountains, easing only toward dusk; frequent or persistent rain and hill snow, heaviest western mountains. Severe gales high tops England & Wales, squally stormy gusts for a time with heavy bursts of rain. Risk of hail and isolated thunder, mainly western areas.

Headline for Peak District

Gales over the hills. Showery bursts with hail.

Detailed Forecast for Friday, 28 November, 2025

How windy? (On the summits)	Southwesterly 35 to 50mph, sudden powerful squalls.
Effect of wind on you?	Arduous conditions with significant wind chill and buffeting. Particularly gusty as showers move in.
How wet? (Precipitation and its impact)	Showers increasingly moving in, heavy bursts with hail Mostly dry dawn, but showers soon move in from the west, then a more organised band of heavy showers middle of day as a front moves through, risk of hail, chance isolated lightning.
Cloud on the hills?	Mostly bases above tops Bases varying, but generally staying above the tops keeping the hills clear. Patches form over tops for a time during showers.
Chance of cloud free summits?	70% dropping to 40% in showers
Sunshine? Air clarity (below cloud)	Occasional sun, clouding over completely for periods. Visibility often very good, but poor in showers.
Temperature (at 600m)	3C. Wind chill feeling like -12C.
And in the valleys	6 to 8C

All mountain areas of Britain from Saturday, 29 November, 2025

Colder over the weekend with the mountains near or below freezing point, including frost into glens in Scotland by Saturday night. A small scale low on Saturday most likely affects England and Wales bringing rain , upland snow and a core of strong winds for a time. Sunday then mostly dry, bright and cold. Next week, Atlantic lows passing across or just north of Britain will bring frequent rainfall to western mountains together with upland gales. A mix of chilly westerly air and some milder southwesterlies. Freeze-thaw cycles, with periods of fresh snow mostly for Scottish hills, briefly high tops elsewhere.

Forecast issued at 7:00 on Friday, 28 November, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
