## General Summary for Saturday, 10 January, 2026

### British Mountain Summary:

#### Based on forecast chart for noon 10 January, 2026

Most terrain frozen, snow cover over many hills, beware icy surfaces even lower down. Wind fairly light, but feeling blustery at times over Scottish mountains and later northern England. Some snow showers and flurries, mostly toward the west. Varied patchy cloud around hills, sunnier Pennines & NE Scotland.

#### Headline for Peak District

Sunshine over snow cover, wind mostly light.

## Detailed Forecast for Saturday, 10 January, 2026

<b>How windy? (On the summits)</b>	Northerly 15mph or briefly 20mph at first, soon easing, becoming variable 10mph. Later afternoon southwesterly 10-15mph, strongest northern areas. Into night, strengthening toward 30-40mph.
<b>Effect of wind on you?</b>	<b>Fairly small much of daytime.</b> <b>Starting to deteriorate into night.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Very likely dry</b>
<b>Cloud on the hills?</b>	<b>Mostly little if any</b> Hills largely clear, some patchy mist possible mainly valleys and some lower hills.
<b>Chance of cloud free summits?</b>	<b>90%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Sunniest in morning, patchy cloud moves in from west. Visibility excellent.
<b>Temperature (at 600m)</b>	0 or -1C. Feeling like -7C if exposed to wind at first.
<b>And in the valleys</b>	Much terrain frozen into valleys. Sub-zero from dawn, rising to 1 or 2C afternoon.

## Peak District - Looking Ahead

	<b>Sunday 11 January</b>	<b>Monday 12 January</b>
<b>How windy? (On the summits)</b>	South to southeasterly, strengthening rapidly up to dawn, in range 35 to 50mph during daytime, peak speeds may vary.	Southwesterly 35 to 50mph.
<b>Effect of wind on you?</b>	<b>Strenuous walking, often challenging on exposed higher terrain, local powerful gusts lower down; considerable wind chill.</b>	<b>Strenuous walking conditions widely, arduous over exposed higher moors. Considerable wind chill.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Snow soon all rain; thaw begins</b> Snow flurries arrive up to dawn, may become persistent, mostly sleet or rain on lower terrain, possibly freezing rain for a time. Increasingly rain to the tops, setting in heavier at times. Becoming very wet underfoot as snow melts.	<b>Occasional rain</b> Patchy rain most frequent in western areas, particularly near/north of the M62, brief showery bursts mixed in. Wet underfoot due to previous rain and snow melt.
<b>Cloud on the hills?</b>	<b>Becoming extensive</b> Patchy cloud banks on some slopes at first, but filling in more widely from the west to cover many higher areas above 400-500m, or lower some western slopes.	<b>Sometimes on high tops</b> Likely to come and go over higher moors, most cloud above 500-600m, lowest in western areas.
<b>Chance of cloud free summits?</b>	<b>40% dropping to 10%</b>	<b>50%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Overcast and mostly dull. Visibility increasingly poor as precipitation sets in.	Glimpses of sun mostly toward east. Visibility fairly good, though some haze.
<b>Temperature (at 600m)</b>	0C early morning, rising toward +3 to 5C, small variation of temperature with height. Wind chill feeling like -8 to -12C.	5 or 6C. Wind chill feeling around -7C where directly exposed on tops.
<b>And in the valleys</b>	Near freezing at dawn, rising to 2C during daytime, reaching 4 or 5C toward evening.	Mild from dawn, small variation night and day, 7 to 9C.

**Planning Outlook****All mountain areas of Britain from Sunday, 11 January, 2026**

Thawing develops during Sunday, snow turning to rain, rising just above freezing toward highest tops in Scotland, whilst in England and Wales a more rapid and substantial thaw - beware unstable snowpack conditions, then becoming very wet underfoot where melting occurs. A complex and unsettled outlook next week, generally less cold than recently, but still often below freezing over Scottish mountains above 800-1000m, and at least intermittently below freezing over tops in England and Wales. A mix of snow and rain will fall, often snow on Scottish tops with fresh accumulations. Some showery days with hail. Wind will vary in speed and direction day-to-day, some lulls, but risk gales at times on hills.
