## General Summary for Saturday, 24 January, 2026

### British Mountain Summary:

Based on forecast chart for noon 24 January, 2026

Gales widely across high terrain, strongest sustained speeds over Wales. Snowfall continues over east and southeast Scottish Highlands mountains, whiteout on higher terrain; rain lower down. Largely dry and clearer further northwest. Clearer also for the Lake District. Rain frequent in south Wales.

### Headline for Peak District

Windy, gale or near-gale. Cloudy, some light rain.

## Detailed Forecast for Saturday, 24 January, 2026

<b>How windy? (On the summits)</b>	Southeasterly 30 to 40mph, gusty in places around high tops and edges. Strengthening further evening into night, over 50mph some high tops.
<b>Effect of wind on you?</b>	<b>Strenuous walking in exposure, in places buffeting gusts not just on highest terrain; considerable wind chill.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>A little rain</b> Patchy light rain occasionally, but small amounts.
<b>Cloud on the hills?</b>	<b>Varied over tops</b> Covering higher tops for periods above 500-600m, may lift toward or above hills; best breaks toward the west.
<b>Chance of cloud free summits?</b>	<b>50%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Fairly cloudy, dull if cloud persists. Some brighter spells with good visibility further west and northwest.
<b>Temperature (at 600m)</b>	2 or 3C. Directly in the wind feeling like -10C.
<b>And in the valleys</b>	5 or 6C, little variation night into day.

## Peak District - Looking Ahead

	<b>Sunday 25 January</b>	<b>Monday 26 January</b>
<b>How windy? (On the summits)</b>	Southeasterly, speed may vary, in range 15 to 30mph, locally stronger gusts occasionally.	Southeasterly 25-35mph. Strongest wind later in the day, strengthening further overnight.
<b>Effect of wind on you?</b>	<b>At times fairly small, but gustier areas affecting comfortable walking. Marked wind chill in exposure on tops.</b>	<b>Walking will be increasingly strenuous in exposure, buffeting gusts later will challenge balance. Significant wind chill.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Patchy rain</b> Occasional rain and drizzle, perhaps an odd heavier showery fall.	<b>Patchy light precipitation</b> Patchy sleet and snow on and off throughout the day, the precipitation light in nature. Precipitation may linger for extended periods. Low slopes to the northwest will be driest.
<b>Cloud on the hills?</b>	<b>Fairly extensive</b>  Covering higher moors much of the day above 500m, sometimes lower in south and eastern areas.	<b>Fairly extensive</b>  A sheet of cloud shrouds the moors down to the middle or lower eastern slopes. Best chance of higher breaks in the Lancashire Pennines but unlikely breaking above 600m.
<b>Chance of cloud free summits?</b>	<b>20%</b>	<b>20%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Largely cloudy, hazy. Poor visibility over many hills.	Bright skies possible in the west early but soon overcast. Cloud and haze will limit visibility.
<b>Temperature (at 600m)</b>	1 or 2C. Feeling like -5 to -8C in the wind.	-1 or -2C. Feeling like -10C in exposure to direct wind.
<b>And in the valleys</b>	4 or 5C, small change night into day.	1 or 2C, may locally rise to 3C.

**Planning Outlook****All mountain areas of Britain from Sunday, 25 January, 2026**

East to southeasterlies continue onward into next week, frequently strong to gale-force over the mountains, giving severe chill factor. Below freezing across high terrain in Scotland, and into early next week a lowering freezing level over hills in England and Wales. Frequent or persistent snowfall over east and southern Scottish mountains. Patchier and small amounts reaching coastal regions in west-northwest Scotland. Areas of rain and increasingly hill snow push across England and Wales as low pressure remains dominant. Low cloud often covering many hills.
