Temperature (at 600m)	4C
And in the valleys	Lifting to 7 to perhaps 9C

## Peak District - Looking Ahead

	<b>Tuesday 10 February</b>	<b>Wednesday 11 February</b>
<b>How windy? (On the summits)</b>	Southeasterly mostly 20mph but may be stronger for a few hours from dawn	Confidence in forecast is low: Direction varied in the range 10 to perhaps 25mph.
<b>Effect of wind on you?</b>	<b>Mostly fairly small.</b>	<b>Mostly fairly small.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Rain occasionally</b> It may stay dry much of or all day following overnight rain - that may linger until after dawn.	<b>Intermittent rain</b> Rain and drizzle on and off.
<b>Cloud on the hills?</b>	<b>May not clear highest tops</b>  Initially fog may be widespread from 300m up, but should improve as cloud base rises to 500m - possibly sometimes above 600m.	<b>Very extensive</b>  Most hills persistently cloud covered above 400 to 600m.
<b>Chance of cloud free summits?</b>	<b>30%</b>	<b>10%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Occasional sunshine coming through. Mostly very good or perhaps excellent visibility.	Little or no sun. Extensively dull and misty.
<b>Temperature (at 600m)</b>	3C	3 or 4C.
<b>And in the valleys</b>	Will reach around 8C in the afternoon	7C.

**Planning Outlook****All mountain areas of Britain from Tuesday, 10 February, 2026**

A change from mid week as a low centre crosses Britain bringing stronger wind and initially rain. But precipitation will turn to snow Scottish Highlands on Wednesday then progressively southwards into England and Wales on Thursday - with most terrain frozen and fresh snow lying on most mountains by Friday morning. Cold 'winter' conditions will then persist through next weekend.

**Forecast issued at 13:24 on Sunday, 8 February, 2026**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
