

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Sunday, 15 February, 2026

British Mountain Summary:

Based on forecast chart for noon 15 February, 2026

Overnight snow (considerable western Scotland north to Skye) will have cleared, leaving snow (rain lower slopes) showers in Scotland (driest toward east), whilst further south rain and snow on and off. Most mountain terrain will be frozen although thawing lower slopes.

Headline for Peak District

Frozen terrain. Rain on and off. Wind near gale force.

Detailed Forecast for Sunday, 15 February, 2026

How windy? (On the summits)	Westerly 25 to sometimes 35mph at dawn and intermittently again afternoon.
Effect of wind on you?	Considerable wind chill and widely arduous walking on higher areas.
How wet? (Precipitation and its impact)	Rain on and off Snow before dawn. By late morning risk showers, mainly areas north of Manchester, although an hour or two of frequent or persistent rain middle of day or afternoon.
Cloud on the hills?	Intermittently clearing to or above higher areas Fog across the hills from dawn in rain. Will improve intermittently as cloud base rises to or above 500 or 600m - though fog returning above 300 or 400m for periods in rain.
Chance of cloud free summits?	20%
Sunshine? Air clarity (below cloud)	Occasional sunshine. Excellent visibility, but poor in rain.
Temperature (at 600m)	Soon 3C. Will feel as close to minus 8C where exposed to the wind.
And in the valleys	Nearly all terrain frozen at first, but thaw commencing and valley temperature reaching around 6C.

Peak District - Looking Ahead

	Monday 16 February	Tuesday 17 February
How windy? (On the summits)	Westerly, later northwesterly in the range 25 to 30mph.	Northerly high confidence in dropping to less than 15mph in a lull, but for a few hours from dawn 20, possibly 30mph.
Effect of wind on you?	Will impede ease of walking and give marked wind chill.	Becoming negligible
How wet? (Precipitation and its impact)	Snow showers; sometimes frequent Snow and hail showers, mainly afternoon; may be frequent or the precipitation almost constant over a couple of hours. Mostly rain below 400m. Isolated thunder morning.	Precipitation not expected
Cloud on the hills?	Extensive on higher areas Cloud base varying, between 300m near precipitation and otherwise 500 to occasionally above the summits.	Not expected
Chance of cloud free summits?	30%	90%
Sunshine? Air clarity (below cloud)	Occasional sunshine. Very varied visibility; very poor in snow, but otherwise very good.	Bright sunshine. Superb visibility.
Temperature (at 600m)	1C. Will feel around minus 8C directly in the wind.	-1C
And in the valleys	Risk slight frost some valleys at dawn. Temperature around 6C in the afternoon.	Terrain may be partly frozen at first after a frost. Will reach around 6C early afternoon.

Planning Outlook**All mountain areas of Britain from Monday, 16 February, 2026**

Persistently cold most mountain areas, particularly across Scotland next week. Further snow from time to time. England and particularly Wales will have intermittently higher freezing levels resulting in freeze-thaw cycles.
