

# Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

**Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.**

## General Summary for Sunday, 31 May, 2026

### British Mountain Summary:

**Based on forecast chart for noon 31 May, 2026**

Showers in Scotland, most frequent west where hill cloud will linger; clearer east, cloud caps around showers. Early showers and hill cloud England and Wales, cloud lifts to just passing caps Scafell and Yr Wyddfa, sun bursts breaking out and showers largely fade. Moderate breeze, occasional stronger gusts high tops.

### Headline for Peak District

Morning showers; mostly dry afternoon, increasing sun

## Detailed Forecast for Sunday, 31 May, 2026

<b>How windy? (On the summits)</b>	Westerly 20-25mph, occasionally lighter speeds; some stronger gusts in the early morning over tops, and also around showers.
<b>Effect of wind on you?</b>	<b>Fairly small, some nuisance breezes over high edges, and gusty early.</b>
<b>How wet? (Precipitation and its impact)</b>	<b>Morning showers, substantially dry afternoon</b> Scattered showers drifting from the west, small risk of a few heavier falls in the morning. Easing from midday, the afternoon mostly dry, just a few spots of drizzly rain possible.
<b>Cloud on the hills?</b>	<b>Soon lifting above the summits</b> Most hills above 500m start in cloud, some lower banks on western aspects north of Kinder Scout. Lifting after daybreak to clear the summits by midday.
<b>Chance of cloud free summits?</b>	<b>Rising to above 90%</b>
<b>Sunshine? Air clarity (below cloud)</b>	Patchwork of cloud and sun, more extensive sunny periods through afternoon. Very good visibility.
<b>Temperature (at 600m)</b>	9 or 10C, rising to 13C.
<b>And in the valleys</b>	12C at dawn rising to 16 or 17C.

## Peak District - Looking Ahead

	Monday 1 June	Tuesday 2 June
<b>How windy? (On the summits)</b> <b>Effect of wind on you?</b>	South-southwesterly 20-25mph, strengthening, 30-35mph by evening some stronger breezes possible. <b>Ease of walking impacted from dawn, deteriorating to strenuous conditions, strongest wind may affect stability.</b>	Westerly 15 to 20mph, occasional 25mph. <b>Fairly small, but feeling breezy on exposed higher moors.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Rain soon frequent</b> Patchy rain drifts from the southwest from before dawn, gradually becoming more frequent, a few heavy bursts, and probably persistent for several hours.	<b>Heavy thundery showers</b> Showery rain on and off, but likely frequent for a few hours through middle of day, some heavy bursts, risk of thunder. Many showers may clear east later, but possibly still further showers into evening.
<b>Cloud on the hills?</b>  <b>Chance of cloud free summits?</b>	<b>Often covering high terrain</b>  Patches at varied heights in the morning, briefly lifting to summits with breaks for several hours, but cloud then more often shrouding summits through afternoon, banks to 500m with lower patches around rain, fewer breaks with time.  <b>70% lowering to 30%</b>	<b>Lifting above tops</b>  Some patchy cloud banks mainly over western higher moors in the morning, but lifting to leave most cloud above the hills.  <b>80%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Some sunny glimpses in the morning but soon trending overcast. Very good visibility, deteriorating with fog and rain.	Glimpses of sun. Visibility very good, reduced in showers.
<b>Temperature (at 600m)</b>  <b>And in the valleys</b>	10C rising to 12 or 13C. Feeling like 3C in strongest direct wind.  11C at dawn, rising to 16C.	10C up to 13C afternoon.  11C at dawn, rising to max 18C afternoon.

**Planning Outlook****All mountain areas of Britain from Monday, 1 June, 2026**

An unsettled week ahead with low pressure facilitating periods of rain, showers, and a strengthening wind, as well as cooler temperatures. Rain spreads across most areas from the southwest on Monday, followed by showers on Tuesday, these showers perhaps turning into thunderstorms in central and east areas. The only settled window this week overnight into Wednesday, then more rain soon arrives from the west through Wednesday morning, spreading widely and with it gales likely over most hills as well except the far north of Scotland. Thursday and Friday remain showery and windy, nearly persistent rain and extensive low cloud northwest England and west Scotland, a few breaks in the east but showers always most widespread afternoon and even smaller hills seeing cloud over summits for periods.

**Forecast issued at 16:10 on Saturday, 30 May, 2026**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
