

# Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

**Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.**

## General Summary for Monday, 1 June, 2026

**British Mountain Summary:  
Based on forecast chart for noon 1 June, 2026**

Rain affects all areas during the day, some heavy falls widely, most constant in Wales. Low cloud across the hills, blanketing to lower slopes in west coastal areas. South-southwest winds, varied in Scotland, but stronger England and particularly Wales, here gales over tops. Fairly mild air, but feeling cooler in wind.

**Headline for Peak District**

Increasingly windy. Rain becoming more persistent, cloud lowers.

## Detailed Forecast for Monday, 1 June, 2026

<b>How windy? (On the summits)</b>	South-southwesterly 20-25mph, strengthening, 30-35mph afternoon into evening, some stronger gusts later.
<b>Effect of wind on you?</b>	<b>Ease of walking impacted from dawn, deteriorating to strenuous conditions, buffeting gusts develop in exposure.</b>
<b>How wet? (Precipitation and its impact)</b>	<b>Rain develops to become persistent</b> Patchy rain drifts from the southwest from dawn, mostly very little much of morning, especially east. Steadier rain moving in middle of day into afternoon, some heavier falls develop from the west. Rain continuing into evening.
<b>Cloud on the hills?</b>	<b>Increasingly covering high terrain</b> Patches at varied heights at first, for a time above many hills, but cloud lowering widely more often shrouding high moors through afternoon, banks to 500m with lower patches around rain in west, fewer breaks with time.
<b>Chance of cloud free summits?</b>	<b>70% lowering to 30%</b>
<b>Sunshine? Air clarity (below cloud)</b>	Some weak glimpses of sun in the morning but soon trending overcast. Very good visibility early in day, deteriorating with fog and rain.
<b>Temperature (at 600m)</b>	10C rising to 12C. Feeling like 3C in strongest direct wind.
<b>And in the valleys</b>	11C at dawn, rising to 16C, quite humid.

## Peak District - Looking Ahead

	<b>Tuesday 2 June</b>	<b>Wednesday 3 June</b>
<b>How windy? (On the summits)</b>	Westerly 15 to 20mph, occasional 25mph.	South-southwesterly 30 to 40mph, at times near 50mph at least in gusts on high tops.
<b>Effect of wind on you?</b>	<b>Fairly small, but feeling breezy on exposed higher moors.</b>	<b>Widely strenuous walking in exposure, buffeting gusts on higher tops, balance challenging. Considerable wind chill.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Heavy thundery showers</b> Showery rain on and off, but likely frequent for a few hours through middle of day, some heavy bursts, risk of thunder. Many showers may clear east later, but possibly still further showers into evening.	<b>Rain for a time and drizzle</b> Patchy rain extends in from the west, merging into some more persistent rain for a time mainly in west, then fading to drizzle, may ease off especially in east.
<b>Cloud on the hills?</b>	<b>Lifting above tops</b>  Some patchy cloud banks mainly over western higher moors in the morning, but lifting to leave most cloud above the hills.	<b>Hill fog especially in rain</b>  Covering higher moors for periods, may linger above 500-600m in west, sometimes lower in rain. Rising somewhat in afternoon if dry, may clear tops.
<b>Chance of cloud free summits?</b>	<b>80%</b>	<b>30%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Glimpses of sun. Visibility very good, reduced in showers.	Glimpses of sun mostly east, largely cloudy. Visibility good below cloud, but reduced in rain.
<b>Temperature (at 600m)</b>	10C up to 13C afternoon.	9C rising to 12C afternoon. Wind chill feeling like 0 to -3C.
<b>And in the valleys</b>	11C at dawn, rising to max 18C afternoon.	10C at dawn, rising to max 17C afternoon.

**Planning Outlook****All mountain areas of Britain from Tuesday, 2 June, 2026**

An unsettled spell through early June, possibly through the first two weeks, as low pressure over the north Atlantic and southwesterly winds dominate. Periods of rain mixed with showery days widely - the most constant rain over western mountains with low cloud often shrouding the hills. Wind speed will vary, but up to gale-force for periods over the hills, mostly in Scotland by later this week. Higher pressure to the south tends to expand across and just east of Britain later in the week, bringing some drier weather, but western hills even in England and Wales may remain often misty and drizzly. Temperatures near average, cooler at times. Mid June onward shows signs of drier and warmer weather.
