## General Summary for Monday, 8 June, 2026

### British Mountain Summary:

**Based on forecast chart for noon 8 June, 2026**

Early rain across England and Wales, and perhaps eastern Scotland, soon clears eastwards. Following on, a south-westerly with scattered showers: risk of afternoon thundery ones northeast Scotland. Fewer showers and turning much brighter for England and Wales with hills becoming mostly clear.

### Headline for Peak District

Wet start, but rain soon clears, then mostly dry and bright with spells of sunshine.

## Detailed Forecast for Monday, 8 June, 2026

<b>How windy? (On the summits)</b>	South-westerly soon westerly 15 to 25mph, but briefly up to 30mph early in the morning.
<b>Effect of wind on you?</b>	<b>Fairly small effect on walking, but feeling blustery and rather cool on exposed high terrain.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Early rain clears, then mostly dry.</b> A band of rain, heavy for a time, clears eastward mostly by mid morning. Then as with a ridge of high pressure following in, it will remain very likely dry through much of the day. Some evening showers.
<b>Cloud on the hills?</b>	<b>Clearing hills</b> Banks of low cloud from dawn, down to 300-500m, may linger to mid morning, but as rain clears, bases will lift and breaks up markedly, with cloud lifting off hills. Then hills clear through day.
<b>Chance of cloud free summits?</b>	<b>30% lifting to 90%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Spells of sunshine by middle of the day. Visibility very good after early rain clears.
<b>Temperature (at 600m)</b>	7 to 9C. Feeling near freezing directly in the wind.
<b>And in the valleys</b>	10C at dawn, rising to 15C afternoon, but always a little cooler in rain.

## Peak District - Looking Ahead

	<b>Tuesday 9 June</b>	<b>Wednesday 10 June</b>
<b>How windy? (On the summits)</b>	South-westerly 15 to 25mph, may reach 30mph at times tops in the afternoon.	Westerly 15 to 20mph
<b>Effect of wind on you?</b>	<b>May impede walking at times over the tops in the afternoon, with a marked wind chill.</b>	<b>Fairly small, but noticeable chill factor, despite the modest breeze.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Showers becoming widespread</b> Showers at first, concentrated in the west, but becoming widespread across the area. Some hail possible, with the risk of thunder too.	<b>Showers forming widely, risk thunder</b> Mostly dry start, but from mid morning, showers moving in and developing further. Widely showery by afternoon, risk some hail and thunder.
<b>Cloud on the hills?</b>	<b>Mostly above tops, some patches.</b>  Despite the frequently cloudy skies, bases generally above the tops. However, patches may occasional form here and there in and around rain.	<b>Patches over tops in rain.</b>  Patches forming at times over the tops in and around showers.
<b>Chance of cloud free summits?</b>	<b>80%</b>	<b>70%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Patchy sun, but skies tending to fill in with cloud for lengthy periods. Visibility often very good away from showers.	Variable cloud and bursts of sun.  Visibility mostly very good, but poorer in showers.
<b>Temperature (at 600m)</b>	5C lifting to 7C	4C lifting to 7C
<b>And in the valleys</b>	Temperatures lifting to highs of 13C	Valley temperature lifting to highs of 13 or 14C

**Planning Outlook****All mountain areas of Britain from Tuesday, 9 June, 2026**

The unsettled period of weather will persist over the coming week with low pressure area centres tracking just to the northwest of Scotland, allowing south-westerly winds to prevail. Rainfall often showery in nature, but coming in frequently to western mountains with the greatest falls for western Scotland. Chilly and windy at times; freezing level touching highest tops Scotland on Tuesday and Wednesday, when showers may fall as wet snow at times over the tops. Temperatures trending warmer again next weekend, as pressure is likely to rise from the south to give drier weather more widely.

**Forecast issued at 16:25 on Sunday, 7 June, 2026**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
