Chance of cloud free summits?	90%	90%
Sunshine? Air clarity (below cloud)	Extensive sunshine. Persistent haze.	Periods of sunshine. Persistent haze.
Temperature (at 600m)	20C rising toward an exceptionally hot 24 to perhaps 27C.	Exceptionally warm 26 to 32C in afternoon. Unusually humid.
And in the valleys	Rising to 29 to perhaps 33C in the afternoon.	Between 31 and possibly 36C in the afternoon.

Planning Outlook**All mountain areas of Britain from Wednesday, 24 June, 2026**

Exceptionally warm and humid most mountain areas until later Friday. The range in temperature in the detailed forecasts for Wednesday and Thursday reflect uncertainty in just how far north the extreme heat will penetrate - with more recent forecasts suggesting the (even) more extreme temperatures.

Scattered thunderstorms on Thursday and Friday, whilst over the weekend, progressively less warm as fronts begin to come in off the Atlantic, bringing bands of rain and low cloud, particularly affecting western mountains.
