

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Sunday, 28 June, 2026

British Mountain Summary:

Based on forecast chart for noon 28 June, 2026

Strengthening southwesterly winds, reaching gale force over western Scottish mountains, soonest near Skye. Much fresher everywhere, rather chilly on tops in exposure to wind. Some early rain, improving as cloud lifts and breaks, but scattered showers move east across the Highlands into the afternoon.

Headline for Peak District

Breezy. Early patchy rain, cloud lifts to clear hills.

Detailed Forecast for Sunday, 28 June, 2026

How windy? (On the summits)	Southwesterly 20-25mph, strongest sustained wind up to dawn, 30mph briefly; increasing a little again toward dusk.
Effect of wind on you?	Fairly small, but feeling breezy and fresh on the hills, more blustery very early and late in the day.
How wet? (Precipitation and its impact)	Early showers, little or none afternoon Patchy rain passes west-to-east from before dawn into morning, an odd heavier shower, but many places soon more often dry. Rare light showers into afternoon or most places entirely dry.
Cloud on the hills?	Variable early, then above summits Cloud lingering near the high tops early in the morning, some breaks, but also lowering briefly during bursts of rain. Rising above the summits middle of day into afternoon.
Chance of cloud free summits?	50% rising to 90%
Sunshine? Air clarity (below cloud)	A few bursts of morning sun, breaking to a patchwork of cloud and sun by middle of day. Visibility becomes excellent.
Temperature (at 600m)	13C rising to 16C early afternoon, cooling later in day toward 11C by dusk. Feeling like 6 to 9C directly in breeze on tops.
And in the valleys	15 or 16C at dawn, rising to 20C by early afternoon; much fresher than recent days.

Peak District - Looking Ahead

	Monday 29 June	Tuesday 30 June
How windy? (On the summits)	Westerly 20-25mph, easing, finishing near 10mph evening or less.	Southerly 15 to 20mph, later shifting southwesterly, speeds may rise a little.
Effect of wind on you?	Ease of walking impacted in exposure early, notably northernmost moors, but easing to negligible effects.	Fairly small.
How wet? (Precipitation and its impact)	Spotty rain, few showers, often dry A few spots of light rain drift from the west from time to time, amounting to little and more often dry. Increased risk of showers for several later afternoon hours.	Showery rain Patchy rain and showers extending eastwards across the region throughout the day, possibly more frequent for periods, some heavier bursts develop, risk of isolated thunder.
Cloud on the hills?	Soon clear Some patchy cloud on upper terrain around dawn, summits may start covered, but cloud soon lifts and breaks after dawn for cloud-free moors.	Lowering over tops around rain Cloud banks covering higher moors particularly in western areas around rain, mostly above 500m, some ragged lower patches; otherwise above the hills.
Chance of cloud free summits?	90%	70%
Sunshine? Air clarity (below cloud)	A patchwork of cloud and sunshine, some variable thin high cloud around. Very good visibility.	Generally cloudy, a little weak sun mainly morning in east. Visibility often reduced by rain, poor for periods; intermittently very good if dry.
Temperature (at 600m)	9C rising to 16 or 17C.	11C rising to 15C afternoon.
And in the valleys	10 or 11C at dawn, rising to 21C afternoon.	12C at dawn, rising to 20C afternoon.

Planning Outlook**All mountain areas of Britain from Monday, 29 June, 2026**

A westerly Atlantic pattern dominates the new week: high pressure south and low pressure north will bring alternating periods of rain punctuated by bright sunshine. Wind generally on the strong side with mild to sometimes warm temperatures, though cooler and windier spells at times produce significant wind chill on Scottish tops. Western hill groups from Lakeland northward will see the most cloud and patchy rain, while east and southern areas likely drier and sunnier. This pattern is likely to continue into next weekend.

Forecast issued at 16:00 on Saturday, 27 June, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
