

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Monday, 6 July, 2026

British Mountain Summary: Based on forecast chart for noon 6 July, 2026

Windy and generally wet across Scottish hills, rain and drizzle most persistent in northwestern Highlands. Breezy, damp and drizzly too for northern England. Drier and lighter winds for Wales. Poor visibility with low cloud cloaking many hills through the day, best of any breaks toward east.

Headline for Peak District

Breezy, strongest early and late; low cloud tending to lift.

Detailed Forecast for Monday, 6 July, 2026

How windy? (On the summits)	Westerly 20 to 30mph, in places strong gusts over tops early morning, as high as 40mph; speeds rising a little again by evening.
Effect of wind on you?	Ease of walking becoming impacted on high terrain, particularly in early gusts; locally fairly small effects.
How wet? (Precipitation and its impact)	Substantially dry A few spots of light rain across northern moors in the morning, otherwise dry.
Cloud on the hills?	Lifting off the hills Fog covers most high terrain in the morning with some lower banks, most extensive to the west of high edges. Cloud lifts through morning for clear hills afternoon.
Chance of cloud free summits?	30% dawn, rising to 80% by afternoon
Sunshine? Air clarity (below cloud)	Occasional weak sun through high cloud. Very good visibility once early mist clears.
Temperature (at 600m)	12C rising to 14 or 16C, warmest south and eastern moors. Feeling like 5C in strongest wind.
And in the valleys	14C at dawn rising to 21C, perhaps several degrees warmer southern valleys, to 23C.

Peak District - Looking Ahead

	Tuesday 7 July	Wednesday 8 July
How windy? (On the summits) Effect of wind on you?	West-northwesterly 25-30mph, quite gusty over the tops and downslope early, easing to around 20mph afternoon. Strenuous walking on high terrain early with notable buffeting; a trend towards fairly small effects.	West to southwesterly 10 to 15mph, in places 20mph at times higher tops. Mostly small.
How wet? (Precipitation and its impact)	Likely dry Small chance of some light sprinkles drifting over northern moors, but likely entirely dry.	No rain expected
Cloud on the hills? Chance of cloud free summits?	Lifting to often clear the summits Fairly extensive over high edges in the morning, lowest bases to the northwest, perhaps to 400-500m at dawn. Lifting, clearing the summits by afternoon, but occasional caps may return to northern summits at times. Rising to 70%	Generally clear Any early patchy mist in valleys or some hill slopes soon dispersing. Above 90%
Sunshine? Air clarity (below cloud)	A mix of cloud and sun, some high cloud around, perhaps sunnier later. Very good visibility.	Sunshine and thin fair-weather cloud. Visibility very good.
Temperature (at 600m) And in the valleys	11 or 12C rising to 16C. 14C at dawn rising to 21 or 22C, some chance of higher temperatures southern valleys.	14C rising to 19C afternoon. 15C at dawn, rising to 24C afternoon.

Planning Outlook**All mountain areas of Britain from Tuesday, 7 July, 2026**

A damp start westerly pattern continues at the start of the week, particularly in Scotland, then a drier and warmer window builds into the middle of the week: very warm in England and Wales, spells of sunshine spread northward, and lighter wind. Some patchy rain continues through late week in western Scotland though detail is uncertain and more often dry. High pressure is indicated to expand across Scotland through next weekend bringing more widely dry and warm conditions in the extended outlook into mid July - easterly winds likely develop, particularly England and Wales; a chance of some thunderstorms.

Forecast issued at 16:00 on Sunday, 5 July, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
