## General Summary for Saturday, 11 July, 2026

### British Mountain Summary:

#### Based on forecast chart for noon 11 July, 2026

Fairly cloudy Scottish highlands, drizzly tops east where a risk of thundery showers; drier west, local bright breaks. A rising risk of heavy/thundery showers forming over Southern Uplands. Very warm and sunny in England, but high cloud and a risk of showers far north later. Extensive hot sunshine for Wales.

### Headline for Peak District

Hot sunshine, risk sunburn and dehydration; breezy later

## Detailed Forecast for Saturday, 11 July, 2026

<b>How windy? (On the summits)</b>	Easterly 10-15mph, gradually trending towards higher speeds and reaching 20-25mph by evening, stronger gusts forming as night falls, risk up to 35mph+.
<b>Effect of wind on you?</b>	<b>Small most of the day, quickly becoming quite breeze late in the day into night.</b>
<b>How wet? (Precipitation and its impact)</b>	<b>No rain expected</b>
<b>Cloud on the hills?</b>	<b>Hills clear</b>
<b>Chance of cloud free summits?</b>	<b>Nearly certain</b>
<b>Sunshine? Air clarity (below cloud)</b>	Extensive sunshine. Slight haze in the morning, this lifting and fading for excellent visibility.
<b>Temperature (at 600m)</b>	16C rising to 23C.
<b>And in the valleys</b>	16C at dawn, western valleys a degree milder than eastern valleys. Rising to 27C.

**Peak District - Looking Ahead**

	<b>Sunday 12 July</b>	<b>Monday 13 July</b>
<p><b>How windy? (On the summits)</b></p> <p><b>Effect of wind on you?</b></p>	<p>Easterly 20-25mph. Notable gusts over tops and stronger speeds early and late, top speeds approach 40mph.</p> <p><b>Ease of walking at times affected on high terrain, particularly early and late when strongest gusts affect stability.</b></p>	<p>Easterly 15-20mph; stronger sustained wind early with notable gusts over tops and downslope, risk approaching 35mph.</p> <p><b>Fairly small, but morning gusts may be quite strong, affecting stability.</b></p>
<p><b>How wet?</b> (Precipitation and its impact)</p>	<p><b>No rain expected</b></p>	<p><b>No rain expected</b></p>
<p><b>Cloud on the hills?</b></p>	<p><b>Extensive early, clearing</b></p> <p>A veil of cloud covers the moors from overnight, extensive over all high terrain, to middle or lower eastern slopes. Soon after sunrise, cloud begins to lift and break, likely none left on the moors by late morning.</p>	<p><b>Little or none</b></p> <p>Varied banks of cloud at all elevations may drift from the east in the early morning, likely well broken with little or no cloud west of high tops. Cloud soon lifts and dissipates after dawn for clear moors.</p>
<p><b>Chance of cloud free summits?</b></p>	<p><b>20% rising to 90%</b></p>	<p><b>Above 90%</b></p>
<p><b>Sunshine?</b> Air clarity (below cloud)</p>	<p>Overcast and foggy at dawn, cloud gradually breaking for extensive afternoon sun with good visibility; some thin high cloud.</p>	<p>Sun increasingly extensive as early low cloud breaks. Very good visibility.</p>
<p><b>Temperature (at 600m)</b></p> <p><b>And in the valleys</b></p>	<p>13C rising to 20C.</p> <p>14C at dawn rising to 23 to 25C, western valleys noticeably warmer.</p>	<p>10C rising to 19C.</p> <p>11C at dawn, rising to 23C or warmer in western valley south of Kinder Scout.</p>

**Planning Outlook**

**All mountain areas of Britain from Sunday, 12 July, 2026**

Staying very warm late weekend into next week. High pressure north of the country keeps the skies mostly clear and facilitates an easterly flow, pushing the warmest temperatures to western hill groups. Northeastern areas will see early sea fog under the high pressure, this dissipating in the sun through morning. Scottish highlands seeing temperatures often rise into the mid-teens, valley temperatures to the 20s west; warmest Wales where hill temperatures often to 20C or higher. A fairly sustained breeze most of the week in England and Wales, at times stronger and quite gusty. Low pressure south of the country may push cloud and showers into Wales, though confidence remains low, and could remain largely dry. Detail uncertain later next week, but a milder northerly flow may begin to establish.
