

Peak District

The southernmost Pennines, covering the entire Peak District National Park, also extending north to hills accessed from Hebden Bridge, and including the hills immediately north of Manchester.

Alpkit is a multi-activity outdoor and bike brand for enthusiasts and adventurers making technical equipment to help you enjoy the outdoors whatever the weather. Go Nice Places, Do Good Things.

General Summary for Wednesday, 29 July, 2026

British Mountain Summary:

Based on forecast chart for noon 29 July, 2026

A swathe of frequent to persistent rain through central & southern Scotland, some heavier bursts with possible thunder and lightning afternoon. Patchier showers in northwest, rather cool here. Warmer and humid southwards, low cloud covering many western hills, some drizzle near Irish Sea.

Headline for Peak District

Breezy, warm and humid. Largely dry, clear hills.

Detailed Forecast for Wednesday, 29 July, 2026

How windy? (On the summits)	South to southwesterly 20 to 25mph, gusty at times.
Effect of wind on you?	Breezy on the hills, more noticeable in places, but fairly small effect on walking.
How wet? (Precipitation and its impact)	Most or all day dry Small risk of an isolated thundery burst of rain late in the day. A band of showery rain develops from west well into night.
Cloud on the hills?	Hills soon clear Some early cloud banks may affect western slopes from dawn into early morning, soon dispersing.
Chance of cloud free summits?	Rising above 90%
Sunshine? Air clarity (below cloud)	Sunshine and varied high cloud, may fill in across the sky for periods. Visibility very good, distant slight haze.
Temperature (at 600m)	15C rising to 20 to 22C afternoon.
And in the valleys	16C from dawn, soon above 20C, rising to 27C afternoon, some valleys in south approach 30C; feeling humid.

All mountain areas of Britain from Thursday, 30 July, 2026

Cool and showery westerlies late this week and into Saturday, windy over high terrain; western hills often capped in cloud. Rain may encroach from the southwest on Sunday, winds turn southerly and warmer air wafts back across England and Wales at least. A complex area of low pressure is then expected to circulate slowly over Britain early next week, bringing areas of rain and heavy showers, some thundery downpours possible. Winds varying, may strengthen northwesterly by Tuesday to gales. An improving trend into midweek, but showery westerlies likely prevail in Scotland at least. Despite spells of rain, beware ongoing fire management restricting access to some mountains.

Forecast issued at 16:15 on Tuesday, 28 July, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
