A small festival BIG on adventure - Great Longstone, Peak District

General Summary for Sunday, 23 August, 2026

British Mountain Summary:

Based on forecast chart for noon 23 August, 2026

A fine day for most places with light winds. Patchy cloud around some hill slopes early in the day will lift to leave many summits clear, but cloud banks are likely to persist on west coastal tops in Scotland, a little drizzle here in the morning, breezier too in the far northwest.

Headline for Peak District

Dry, hills clear most of day.

Detailed Forecast for Sunday, 23 August, 2026

Chance of cloud free summits?	Above 90%
Sunshine? Air clarity (below cloud)	Sunshine mostly morning, fair-weather cloud fills in afternoon. Very good visibility.
Temperature (at 600m)	9C rising to 15C.
And in the valleys	6C or locally cooler at dawn, rising to 20C afternoon.

All mountain areas of Britain from Monday, 24 August, 2026

A fine start to the week with high pressure nearby, but easterly breezes will tend to strengthen. Most places dry through Monday and Tuesday, but generally deteriorating from the south into midweek as low pressure moves in from the south, patchy rain will increasingly spread northward with some local stronger wind. Broadly unsettled as next weekend approaches with bands of heavy rain forming mixed with showery bursts at times, but fairly warm and somewhat humid. Wind speed and direction likely to vary considerably day-to-day.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
