General Summary for Saturday, 10 October, 2026

British Mountain Summary:

Based on forecast chart for noon 10 October, 2026

Westerly gales across many mountains will make walking challenging and bring significant chill factor; air temperature close to freezing point on highest summits. Rain most persistent in western Scotland, snow falling on high tops. Frequent showery rain for northwest England, fewer showers south across Wales.

Headline for Peak District

Windy, gales on tops; showery rain.

Detailed Forecast for Saturday, 10 October, 2026

How windy? (On the summits)	West-northwesterly 35 up to 45mph on higher moors, very gusty, speeds tending to rise a little during day. Gradually lowering speeds onward into night.
Effect of wind on you?	Arduous walking at least, gusts constantly challenging balancing and knocking you around. Significant wind chill.
How wet? (Precipitation and its impact)	Showers Showers stream in from the northwest most of the day, generally light but a few heavy bursts and extended falls over western areas. Drier toward eastern moors.
Cloud on the hills?	Varied over high terrain Cloud will come and go mostly above 500m, a few ragged shreds reaching lower at times, but also clear windows. Slopes east of high edges clearest of cloud.
Chance of cloud free summits?	60%
Sunshine? Air clarity (below cloud)	Patchy sunshine, more often cloudy to the west. Visibility varied in and out of showers, also some haze.
Temperature (at 600m)	6 or 7C. Feeling like -3 to -6C in direct wind.
And in the valleys	8C at dawn, rising to 10 to 12C, but temperature will vary with coming and going of showers.

All mountain areas of Britain from Sunday, 11 October, 2026

After a fine but cool day on Sunday, damp and mild southwesterly air moves back across the country into Monday. Southwesterly winds strengthen late Monday to widely gale-force over the hills, heavier rain likely into early Tuesday, followed by showers and a slight drop of temperature. Very unsettled west-southwesterlies continue into midweek - sustained mountain gales, possibly stormy at times and spells of heavy rain for all areas. A changeable westerly theme likely continues beyond mid-month - occasional windows of drier weather, but more often windy with rain or showers coming in from the Atlantic, sometimes cold enough to fall as snow on Scottish high tops.

Forecast issued at 16:00 on Friday, 9 October, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
