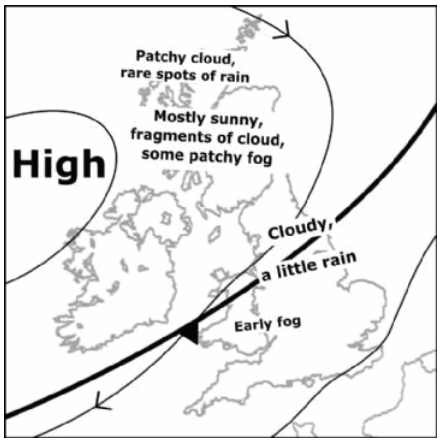
General Summary for Sunday, 1 November, 2026



British Mountain Summary:
Based on forecast chart for noon 1 November, 2026

A fine day for the Highlands, with sunshine and just patchy cloud around some tops. One or two light showers in northern areas.
A weakening front drifts south over England & Wales giving cloudy skies and a little rain for a time, mainly more eastern hills.
Light-moderate winds overall, but feeling chilly.

Headline for Peak District

Varied cloud, spots of rain develop; breezy, feeling cool.

Detailed Forecast for Sunday, 1 November, 2026

How windy? (On the summits)	Northeasterly 20mph, at times 25mph over higher exposed terrain.
Effect of wind on you?	**Fairly small effect on walking, but noticeably breezy and feeling rather chilly over higher moors.**
How wet? (Precipitation and its impact)	**Occasional drizzle, an odd shower** A little patchy drizzly rain mainly middle of day into afternoon, locally a local sprinkle of a shower, but amounting to very little.
Cloud on the hills?	**Mix of fog and low cloud, hills clear at times** Varied extent of fog and low cloud - some fog mostly in valleys with some hills clear, but likely to blanket higher terrain for periods too. Then in afternoon tending to gradually thin and break, best in west.
Chance of cloud free summits?	**50%**
Sunshine? Air clarity (below cloud)	Rather cloudy overall, some glimpses of sun may emerge in the west. Quite hazy, or foggy at varied heights in morning.
Temperature (at 600m)	6 or 7C. Feeling near 0C in the breeze on tops.
And in the valleys	6C at dawn, rising to 11C afternoon.

Peak District - Looking Ahead

	Monday 2 November	Tuesday 3 November
How windy? (On the summits)	Northeastely 20 to 25mph, tending to rise during day, nearer 30mph high tops later.	East to northeasterly 25 to 30mph, some gusty areas around higher tops and edges.
Effect of wind on you?	**Feeling noticeably breezy and chilly on high terrain. Ease of walking more affected later.**	**Blustery with considerable wind chill on exposed terrain, some strenuous walking higher up and gusts affecting balance.**
How wet? (Precipitation and its impact)	**Rain unlikely** Chance of a little drizzle if cloud thickens over eastern moors, mainly later in the day.	**Some drizzly rain** A little light rain or drizzle occasionally, mostly toward eastern moors, patchier westwards.
Cloud on the hills?	**Mostly above hills** Patches may graze higher moors, but most cloud above hill tops.	**Lifting mostly above tops** Some cloud banks over higher moors early morning, but likely soon lifting just above most hills and may increasingly break up particularly in west.
Chance of cloud free summits?	**80%**	**80%**
Sunshine? Air clarity (below cloud)	Occasional sun, mostly toward west. Visibility very good, some haze lower down.	Fairly cloudy, a little sun breaking through, mostly western areas. Visibility good, but slight haze.
Temperature (at 600m)	3 to 5C. Feeling nearer -5C directly in wind.	6C, little change all day. Feeling like -3 to -5C directly in the wind.
And in the valleys	Patchy frost in valleys at first. Rising to 11C afternoon.	6C at dawn, up to 11C afternoon.

Planning Outlook

All mountain areas of Britain from Monday, 2 November, 2026

A settled start to November as high pressure resides toward the north. Largely dry weather throughout the week ahead. Variable cloud will be drawn in from the North Sea on easterly winds, at times some light showers mainly for Pennine areas. Best chance for inversion conditions will be on higher tops in Scotland, emerging above cloud at times. Sunshine typically best toward western coasts. Temperatures mostly above freezing on high terrain, but some frost overnight in glens and some upland hollows. Quiet weather may continue into next weekend, then a trend toward more unsettled conditions into mid-month, possibly colder patterns too.

Forecast issued at 16:00 on Saturday, 31 October, 2026
