General Summary for Monday, 2 November, 2026

British Mountain Summary:
Based on forecast chart for noon 2 November, 2026

Light winds for much of the Highlands; a stronger northeasterly breeze for England & Wales, particularly toward the south, feeling chilly. Generally dry, sunshine best in southern Scotland and toward the Irish Sea coast. Some cloud banks in northern Scotland, but high mountains may poke out above this.

Headline for Peak District

Breezy, cloud and some sun, but hills mostly clear.

Detailed Forecast for Monday, 2 November, 2026

How windy? (On the summits)	Northeastely 20 to 25mph, tending to rise during day, nearer 30mph at times on high tops, more often later.
Effect of wind on you?	**Feeling noticeably breezy and chilly on high terrain. Ease of walking affected at times on exposed tops.**
How wet? (Precipitation and its impact)	**Rain unlikely** Chance of a little drizzle if cloud thickens over eastern moors later in the day.
Cloud on the hills?	**Mostly above hills** Patches may graze higher moors in morning, but most cloud above hill tops.
Chance of cloud free summits?	**90%**
Sunshine? Air clarity (below cloud)	Fairly cloudy sky, with occasional sun, mostly toward west. Visibility very good, some haze lower down.
Temperature (at 600m)	4 or 5C. Feeling nearer -5C directly in wind.
And in the valleys	Patchy frost in valleys at first. Rising to 11C afternoon.

Peak District - Looking Ahead

	Tuesday 3 November	Wednesday 4 November
How windy? (On the summits)	East to northeasterly 25 to 30mph, some gusty areas around higher tops and edges.	Easterly 25 to 30mph, gusty 35mph in places around edges and locally down western slopes.
Effect of wind on you?	**Blustery with considerable wind chill on exposed terrain, some strenuous walking higher up and gusts affecting balance.**	**Affecting ease of walking on exposed higher slopes, gusts affecting balance in places. Marked wind chill.**
How wet? (Precipitation and its impact)	**Some drizzly rain** A little light rain or drizzle occasionally, mostly toward eastern moors, patchier westwards.	**Occasional spots** A little light rain in the wind from time to time, mostly more eastern areas.
Cloud on the hills?	**Lifting mostly above tops** Some cloud banks over higher moors early morning, but likely soon lifting just above most hills and may increasingly break up particularly in west.	**Mostly above hills** Some cloud may clip highest moors early in day, but most cloud above hill tops.
Chance of cloud free summits?	**80%**	**90%**
Sunshine? Air clarity (below cloud)	Fairly cloudy, a little sun breaking through, mostly western areas. Visibility good, but slight haze.	Fairly cloudy, sun breaking through at times mostly toward west. Visibility good, though some haze.
Temperature (at 600m)	6C, little change all day. Feeling like -3 to -5C directly in the wind.	5C. Feeling like -5C directly in the wind.
And in the valleys	6C at dawn, up to 11C afternoon.	6C from dawn, rising to 10C afternoon.

Planning Outlook

All mountain areas of Britain from Tuesday, 3 November, 2026

A settled week ahead as high pressure resides toward the north. Easterly winds will prevail, strongest for Wales and the southern Pennines. Largely dry weather, whilst variable cloud will be drawn in from the North Sea, at times some light showers in eastern areas. Best chance for inversion conditions will be on higher tops in Scotland, emerging above cloud at times. Sunshine typically best toward western coasts. Temperatures mostly above freezing on high terrain, but some frost overnight in glens and some upland hollows; then cooler toward the weekend on tops. Quiet weather also likely as next weekend begins, perhaps further ahead, though a mixed Atlantic influence may return to Scotland.
