General Summary for Tuesday, 3 November, 2026

British Mountain Summary:
Based on forecast chart for noon 3 November, 2026

Cloud drifts across most eastern mountains, more broken westwards; some highest summits in Scotland close to the top of a cloud sheet at times. Local spots of light rain. Light wind northern Scotland, easterly winds elsewhere, stronger over England & Wales. Sunniest toward all western coasts.

Headline for Peak District

Breezy, gusty. Hills mostly clearing, some sunshine.

Detailed Forecast for Tuesday, 3 November, 2026

How windy? (On the summits)	East to northeasterly 25mph, some gusty areas 30mph around higher tops and edges.
Effect of wind on you?	**Blustery with considerable wind chill on exposed terrain, some strenuous walking higher up and gusts affecting balance.**
How wet? (Precipitation and its impact)	**Some drizzly rain** A little light rain or drizzle occasionally, mostly toward eastern moors, patchier westwards.
Cloud on the hills?	**Lifting mostly above tops** Some cloud banks over higher moors early morning, but likely soon lifting just above most hills and increasingly breaking up soonest in west.
Chance of cloud free summits?	**70% rising above 90%**
Sunshine? Air clarity (below cloud)	Fairly cloudy, a little sun breaking through, mostly western areas. Visibility good, but slight haze.
Temperature (at 600m)	6C, little change all day. Feeling like -3 to -5C directly in the wind.
And in the valleys	6C at dawn, up to 11C afternoon.

Peak District - Looking Ahead

	Wednesday 4 November	Thursday 5 November
How windy? (On the summits) **Effect of wind on you?**	Easterly 25 to 30mph, gusty 35mph in places around edges and locally down western slopes. **Affecting ease of walking on exposed higher slopes, gusts affecting balance in places. Marked wind chill.**	Easterly 30 to 35mph, gusty in places around higher tops and edges, locally downslope to west of high terrain. **Strenuous walking over the hills, sudden buffeting in places including to some lower elevations; considerable wind chill.**
How wet? (Precipitation and its impact)	**Occasional spots** A little light rain in the wind from time to time, mostly more eastern areas.	**A little rain at times** Spots of rain and drizzle in the wind occasionally.
Cloud on the hills? **Chance of cloud free summits?**	**Mostly above hills** Some cloud may clip highest moors early in day, but most cloud above hill tops. **90%**	**Mostly above tops** Much cloud above the hills, some patches may graze close to highest moors around 600m in the morning, then clearing. **80%**
Sunshine? Air clarity (below cloud)	Fairly cloudy, sun breaking through at times mostly toward west. Visibility good, slight haze.	Patchy sunshine best toward west. Visibility very good.
Temperature (at 600m) **And in the valleys**	5C. Feeling like -5C directly in the wind. 6C from dawn, rising to 10C afternoon.	6C. Feeling like -5 to -8C directly in the wind. 6C at dawn, rising to 10C afternoon.

Planning Outlook

All mountain areas of Britain from Wednesday, 4 November, 2026

High pressure persists toward the north this week, maintaining quiet weather conditions. Easterly winds prevail, strongest during midweek over England & Wales, tending to lessen toward the weekend; wind often lighter and variable toward northern Scotland. Largely dry, local light showers or drizzle mostly in the east. Variable amounts of cloud covering hills, some higher Scottish tops emerging above an inversion at times. Sunnier and clearer near to western coasts. Generally just above freezing over the mountains, but local pockets of frost in shelter and in glens; toward the weekend, high Scottish tops dip just below freezing.
