General Summary for Friday, 6 November, 2026

British Mountain Summary:
Based on forecast chart for noon 6 November, 2026

Fairly light wind and scattered patches of light rain, amounting to little in total. Cloud base will vary, extensive on higher mountains, but lower down some slopes cloud free, whilst sometimes adjacent slopes remain foggy (or even between cloud layers) - with changes occurring only slowly.

Headline for Peak District

Fairly light wind. Extensive fog higher areas.

Detailed Forecast for Friday, 6 November, 2026

How windy? (On the summits)	Easterly, 15mph or in morning perhaps 20mph some higher areas. Will tend to ease through day.
Effect of wind on you?	**Fairly small.**
How wet? (Precipitation and its impact)	**Pockets of rain.** Damp weather with pockets of light or very light rain will come and go, particularly above more eastern dales.
Cloud on the hills?	**Extensive, particularly more eastern hills** Broadly, cloud base around 600m. However, patches of fog will 'hang' above 300 or 400 for perhaps several hours.
Chance of cloud free summits?	**70%**
Sunshine? Air clarity (below cloud)	Occasional or only rare glimpses of sunshine. Hazy and misty in rain.
Temperature (at 600m)	5C. Will feel as cold as minus 2C directly in wind.
And in the valleys	8 to 10C early afternoon.

Peak District - Looking Ahead

	Saturday 7 November	Sunday 8 November
How windy? (On the summits)	Direction varied 10mph or less.	Direction varied 10mph or less.
Effect of wind on you?	**Negligible**	**Negligible**
How wet? (Precipitation and its impact)	**Patches of drizzly rain** Total rainfall small; nevertheless, drizzly rain may fall for an hour or two or in places on and off all day.	**Risk of a little drizzle, total rainfall small** Little change with a few further pockets of light or very light drizzle.
Cloud on the hills?	**Persistent fog.** Low cloud will affect most or all hills, widely below 400m - sometimes forming in or just above valleys.	**Extensive; cloud base sometimes very different on nearby slopes** Detail uncertain: Cloud extensive highest slopes. Lower down, fog clinging to many slopes from valleys up most or all day, whilst others are or become fog free or are between layers of cloud.
Chance of cloud free summits?	**10%**	**20%**
Sunshine? Air clarity (below cloud)	Cloudy or dull and extensively misty or foggy.	Cloudy or dull with extensive fog - possibly brighter with glimpses of sun developing through day.
Temperature (at 600m)	5C	5C
And in the valleys	8 to 10C.	8 to 10C.

Planning Outlook

All mountain areas of Britain from Saturday, 7 November, 2026

High pressure will continue to be the main influence into next week, particularly W & NW Highlands where extensively dry and wind often light. However, disappointing for other areas as 'gloomy' conditions predominate" patches of light rain and extensive low cloud and fog.
Into next week, an area of low pressure will bring rain and wind in from the southwest but northern Scotland may escape most or all the rain.

Forecast issued at 8:10 on Friday, 6 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
