General Summary for Saturday, 7 November, 2026

British Mountain Summary:
Based on forecast chart for noon 7 November, 2026

Extensively cloudy and dull, some drizzle or light rain, but total amounts small. Areas of fog in places from low terrain upward and cloud banks across hills. Clearest hills generally further west, but limited sun. Generally light wind.

Headline for Peak District

Drizzle and low cloud widely.

Detailed Forecast for Saturday, 7 November, 2026

How windy? (On the summits)	Direction varied 10mph or less.
Effect of wind on you?	**Negligible**
How wet? (Precipitation and its impact)	**Patches of drizzly rain** Total rainfall small, but drizzly rain may fall for an hour or two, or in places on and off all day.
Cloud on the hills?	**Persistent fog across the hills, some lifting** Low cloud will affect most or all high terrain and some fog in or just above valleys. A tendency for cloud to rise higher into afternoon, toward some upper slopes.
Chance of cloud free summits?	**10%**
Sunshine? Air clarity (below cloud)	Cloudy or dull and extensively misty or foggy; local improvements with time.
Temperature (at 600m)	5C
And in the valleys	6C at dawn, rising to 8 to 10C.

Peak District - Looking Ahead

	Sunday 8 November	Monday 9 November
How windy? (On the summits)	Direction varied 10mph or less.	Southeasterly 10-15mph.
Effect of wind on you?	**Negligible**	**Small**
How wet? (Precipitation and its impact)	**Patchy drizzle** Local pockets of light or very light drizzle.	**No rain expected** Locally feeling damp where in fog.
Cloud on the hills?	**Extensive; cloud base sometimes very different on nearby slopes** Some local variations, but cloud likely extensive highest slopes. Lower down, fog clinging to many slopes from valleys up most or all day, whilst others are or become fog free or are between layers of cloud.	**Most hills foggy** Some uncertainty, but areas of fog likely from some lower elevations upward to the tops. Locally some slopes may emerge between fog banks.
Chance of cloud free summits?	**20%**	**30%**
Sunshine? Air clarity (below cloud)	Cloudy or dull with extensive fog - some areas become brighter with glimpses of sun developing through day.	Mostly little if any sun. Generally hazy, or foggy.
Temperature (at 600m)	5C	4 or 5C.
And in the valleys	6C at dawn, rising to 8 to 10C.	1 to 3C from dawn, local frost if clear sky. Rising to 5 to 8C, coolest if foggy.

Planning Outlook

All mountain areas of Britain from Sunday, 8 November, 2026

High pressure persists into the start of the new week with light winds for much of Scotland, though an easterly wind will increase for England and Wales. The west and northwest Highlands most extensively dry with cloud breaks and sun. However, disappointing for other areas as 'gloomy' conditions predominate, with patches of light rain and extensive low cloud and fog. Into midweek, an area of low pressure will bring rain and wind in from the southwest but northern Scotland may escape most or all the rain. Late in the week, indications favour a switch to a colder northerly flow for a time in Scotland at least and brings scope for snow showers to northern mountains.
