General Summary for Tuesday, 10 November, 2026

British Mountain Summary:
Based on forecast chart for noon 10 November, 2026

Much of Scotland dry with sunshine; areas of low-level fog and frost. Some showers toward the far north. Fog from lower elevations upward for Pennines and east Wales, but much of northwest Wales and the Lakes have clearer hills. Rain moves into south Wales. Strong easterly winds for Wales.

Headline for Peak District

Gusty wind. Fog and low cloud widely.

Detailed Forecast for Tuesday, 10 November, 2026

How windy? (On the summits)	Southeasterly 20mph, some gusts 25mph may develop.
Effect of wind on you?	**Fairly small, but noticeable on high terrain, gusty in places and feeling cold.**
How wet? (Precipitation and its impact)	**Rain unlikely** Most or all of daylight sees no rain, but feeling damp in the air. Into evening, a little patchy rain moving in from the south.
Cloud on the hills?	**Low cloud or fog to low levels; some breaks west** Foggy across the hills from lower elevations upward, especially in the east and south, with local breaks northwest. The cloud base may lift a little, but likely to shroud much high terrain all day.
Chance of cloud free summits?	**20%**
Sunshine? Air clarity (below cloud)	Largely cloudy, hazy or misty. Some brighter moments further west.
Temperature (at 600m)	4C. Feeling like -3C directly in the wind.
And in the valleys	3 or 4C from dawn, up to 7C afternoon, then little change into evening.

Peak District - Looking Ahead

	Wednesday 11 November	Thursday 12 November
How windy? (On the summits)	Easterly 20 to 30mph, gusty in places around higher edges, strongest in morning.	Northerly 20 to 30mph.
Effect of wind on you?	**Starting to affect comfortable walking on exposed terrain, variable gusts to some lower elevations. Marked wind chill.**	**Affecting comfortable walking in places on exposed higher moors. Considerable wind chill.**
How wet? (Precipitation and its impact)	**Largely dry, some early dampness** Patchy light rain toward the far south of the region in the morning, fading out to be substantially dry, chance of a rare light shower, mainly in the east.	**No precipitation expected**
Cloud on the hills?	**Early low cloud clearing** Banks of cloud likely to cover higher moors in the morning, particularly more eastern slopes, whilst westwards better breaks. Most cloud clearing hills into middle of day.	**None expected**
Chance of cloud free summits?	**50% rising to 90%**	**Above 90%**
Sunshine? Air clarity (below cloud)	Sunshine hazy due to high cloud in morning, may start cloudier; brighter toward the north. Visibility becoming mostly excellent.	Extensive sunshine. Visibility excellent.
Temperature (at 600m)	3 or 4C. Feeling like -5C directly in the stronger wind in the morning.	1 or 2C. Feeling like -7C directly in the wind.
And in the valleys	5C from dawn, rising to 8C middle of day.	Frost widely in valleys in morning. Rising to max 7C afternoon.

Planning Outlook

All mountain areas of Britain from Wednesday, 11 November, 2026

Dropping colder across all mountains during midweek as the wind shifts northerly and strengthens. Some showery snowfall across the Highlands on Wednesday, otherwise plenty of sunshine and very clear air late this week, for all areas - clearing away fog from early in the week. Into the weekend, as the wind shifts west then southwesterly, less cold air drifts in from the Atlantic bringing more cloud onto western hills - an increasing risk of rain in the west. A changeable outlook into next week with varying temperatures, stronger wind at times, rain and some upland snow possible. Unsettled patterns are more likely to prevail beyond mid-month.
