Chance of cloud free summits?	**Above 90%**	**80%**
Sunshine? Air clarity (below cloud)	Extensive sunshine. Visibility excellent.	Sunshine most or all day. visibility very good after fog some valleys morning.
Temperature (at 600m)	0C rising to 2C.	1 rising to 3C.
And in the valleys	Much terrain frozen from dawn with frost all day out of sunlight. Maximum 6C by afternoon.	Widely frosty morning; by early afternoon the temperature between 5 and 8C.

Planning Outlook

All mountain areas of Britain from Friday, 13 November, 2026

The present extensively dry and often relatively windless weather will end over the next few days as low pressure envelopes Britain. Showery conditions (snow on higher areas) will arrive on western mountains (mainly W & NW Scotland) on Saturday, before the threat of widespread rain - or snow higher areas of the Highlands - on Sunday. There may also be upland gales (although as yet considerable uncertainty for Sunday). Next week, frequent precipitation, low cloud and bouts of upland gales.

Forecast issued at 7:40 on Thursday, 12 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
