Effect of wind on you?	**Negligible**
How wet? (Precipitation and its impact)	**Precipitation not expected**
Cloud on the hills?	**Not expected**
Chance of cloud free summits?	**Almost certain**
Sunshine? Air clarity (below cloud)	Extensive bright sunshine. Hazy and patchy fog lower slopes and valleys, visibility excellent higher up.
Temperature (at 600m)	3C.
And in the valleys	Frost widely morning, all day some places out of sunlight. Will reach around 6C in the early afternoon.

Peak District - Looking Ahead

	Sunday 22 November	Monday 23 November
How windy? (On the summits)	Easterly 25 to perhaps 35mph, locally very gusty, sometimes on lower slopes.	Southeasterly 15mph
Effect of wind on you?	**Marked wind chill and sometimes abruptly gusty winds will make balance difficult in places; sometimes on lower slopes.**	**Small.**
How wet? (Precipitation and its impact)	**Precipitation not expected** Risk isolated very light showers.	**Precipitation very unlikely**
Cloud on the hills?	**Little if any** Threat patches highest areas at times.	**May form toward east and south, possibly extensively.** Confidence low: Moderate risk of extensive ver low cloud, base from just above valleys, shrouding much of region, particularly southern and eastern areas. Some higher areas may be above the fog.
Chance of cloud free summits?	**90%**	**50%**
Sunshine? Air clarity (below cloud)	Bright sunshine, perhaps extensive. Visibility very good or excellent.	Lower areas, particularly south and east may be dull and foggy. Periods of sunshine may come through elsewhere, though perhaps hazy.
Temperature (at 600m)	2C. Will feel as cold as minus 5C directly in the wind.	3C.
And in the valleys	Terrain frozen or partly frozen lower slopes, particularly morning out of the sun.	Some lower areas partly frozen in morning after a frost.Temperatures rising to 4 to 7C.

Planning Outlook

All mountain areas of Britain from Sunday, 22 November, 2026

Extensively dry and cold conditions will tend to be eroded away from the west only slowly early next week as high pressure to the east gives way only slowly. Rain, or on higher areas, particularly Scotland, snow, will occasionally make inroads into Wales on Sunday and Monday before the precipitation, together with strong winds progresses across the country. Further bands of precipitation will follow, together with areas of upland gale and low cloud. All in all temperature levels remaining below normal.

Forecast issued at 12:28 on Friday, 20 November, 2026

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2026.
