General Summary for Friday, 27 November, 2020

British Mountain Summary:

Based on forecast chart for noon 27 November, 2020

A little rain Scottish Highlands, and mainly near the west coast low cloud. Elsewhere, dry, but fog wise very varied conditions. Fog in many valleys thins only slowly - if at all. On the hills, cloud often covering higher tops near N Irish Sea, otherwise tops often cloud free.

Headline for Snowdonia National Park

Hardly any wind; fog, mostly lower slopes. Dry.

Detailed Forecast for Friday, 27 November, 2020

| | |
|--|--|
| How windy? (On the summits) | Direction varied, 10mph or less. |
| Effect of wind on you? | Negligible. |
| How wet? (Precipitation and its impact) | Precipitation unlikely |
| Cloud on the hills? | Many summits cloud free On the hills, patches above 800m, but most summits clearing intermittently. In and above valleys areas of fog or very low cloud, persisting all day in some areas. |
| Chance of cloud free summits? | 80% |
| Sunshine? Air clarity (below cloud) | Intermittent sunshine and excellent visibility on higher areas. Lower down, areas where dull murky or foggy, especially east Wales. |
| How Cold? (at 900m) | 0C. |
| Freezing Level | 800 to 1000m - tending to rise during daylight. Widespread slight frost after dawn. |

Snowdonia National Park - Looking Ahead

| | Saturday 28 November | Sunday 29 November |
|---|---|--|
| How windy? (On the summits) | Southeasterly 15 to 25mph. | Direction varied 10mph. |
| Effect of wind on you? | Mostly fairly small; local sudden gusts lower slopes. | Negligible |
| How wet? (Precipitation and its impact) | A little light rain here and there Pockets of light rain, although substantially dry. | Rain not expected |
| Cloud on the hills? | Many higher areas clearing Confidence in the detail low: Broadly, many summits will be or become cloud free, particularly west Wales. However, very low cloud on lower slopes - below 400 to 600m will thin or clear west Wales, but persist all day east Wales. | Higher areas cloud free A mix of fog and mist on lower slopes, most extensive morning. Above 300 to 500m the hills above the cloud. |
| Chance of cloud free summits? | 60% | 80% |
| Sunshine? Air clarity (below cloud) | Cloud thinning and breaking from the south to give sunshine on the mountains. Mist and murk thinning only slowly lower slopes, initially west Wales. | Foggy, misty or murky lower slopes, particularly east Wales in morning. Superb visibility on the hills. |
| How Cold? (at 900m) | 2C, will tend to rise slowly through daylight. | 7C |
| Freezing Level | Frost in most valleys from dawn. Higher slopes staying near freezing point. | Above the summits, although slight frost some slopes after dawn. |

Planning Outlook**All mountain areas of Britain from Saturday, 28 November, 2020**

Very much drier over the coming week, although weakening fronts will bring a little rain and pulses of strong winds, mainly to the NW Highlands. Elsewhere, winds light and although extensively dry, fog will be widespread in and above valleys whilst higher up many summits become cloud free.

Temperature wise, the odd brief incursion of sub-freezing air onto higher summits Scottish Highlands, but any sustained cold at least a week off. Frost in valleys mostly confined to England and particularly Wales.
