## General Summary for Friday, 24 May, 2024

### British Mountain Summary:

#### Based on forecast chart for noon 24 May, 2024

Weakening low pressure over Scotland leaves extensive low clouds over the hills. Inland Scotland and northern England patchy rain in the morning and in the afternoon. Some sunshine in the south (Peak District, Brecon Beacons) and on western Scottish coast second part of the day. Only gentle breeze even on the highest tops.

### Headline for Eryri / Snowdonia National Park

Cloudy but mostly dry, little rain possible locally.

## Detailed Forecast for Friday, 24 May, 2024

<b>How windy? (On the summits)</b>	Westerly 15 to 20mph.
<b>Effect of wind on you?</b>	Fairly small
<b>How wet?</b> (Precipitation and its impact)	<b>Low risk of local showers near the coast</b> Patchy rain drifting around slowly from dawn into the morning on the western coastal hills. Mostly dry afternoon.
<b>Cloud on the hills?</b>	<b>Lifting and breaking</b> Varied banks of cloud covering the hills in the morning, bases tending to rise during the day, some breaks to upper slopes with time.
<b>Chance of cloud free summits?</b>	<b>40%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Glimpses of sun occasionally. Visibility increasingly good with clouds lifting.
<b>How Cold? (at 900m)</b>	4 to 6C
<b>Freezing Level</b>	Above the summits

	<b>Saturday 25 May</b>	<b>Sunday 26 May</b>
<b>How windy? (On the summits)</b>  <b>Effect of wind on you?</b>	South to southeasterly, 10 to 25mph.  <b>Fairly small.</b>	South to southwesterly, 20 to 30mph, with gusts up to 40mph possible on the highest tops.  <b>Fairly small on lower hills, moderate on the tops. In the afternoon, walking may become strenuous on exposed ridges.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Morning drizzle possible.</b> Light drizzle possible in the morning.	<b>Rain on and off, locally heavy afternoon</b> Showers from the overnight into the day, local intensification of rain in the afternoon. Chance of isolated thunder.
<b>Cloud on the hills?</b>  <b>Chance of cloud free summits?</b>	<b>Morning covering tops, later mostly lifting</b> Starting with dense clouds covering hills and valleys, later widely lifting with some breaks in cloud cover. Highest tops longer covered, perhaps clearing only late afternoon.  <b>10%, rising to 70%</b>	<b>Hills covered extensively, afternoon slowly lifting.</b> Clouds covering mountains from start of the day, slowly lifting, uncovering some lower elevated areas in the afternoon.  <b>10%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Some sunshine through breaks in the cloud cover in the afternoon. Toward evening increasing cloudiness from the west. Visibility good, possible slight haze.	Mostly dull, chance for few sunbeams through the clouds in the afternoon between the showers. Poor visibility, improving if clouds lift.
<b>How Cold? (at 900m)</b>  <b>Freezing Level</b>	7 to 9C.  Above the summits.	6 to 9C, feeling close to freezing where exposed to strong winds.  Above the summits.

**Planning Outlook**

**All mountain areas of Britain from Saturday, 25 May, 2024**

Low pressure system will fade upon the weekend arrival, allowing for a short improvement in the weather on Saturday. Into Sunday, shallow low from the east brings a risk of worsening conditions in Scotland and northern England, while western areas will see a new cold front coming from the Atlantic bringing moist, unstable air and spells of rain or showers, continuing into Bank Holiday. With a series of fronts from the west, next week will likely stay changeable, with more cloudy and wet days than sunny spells.

**Forecast issued at 16:22 on Thursday, 23 May, 2024**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
