## General Summary for Monday, 27 May, 2024

### British Mountain Summary:

#### Based on forecast chart for noon 27 May, 2024

Low pressure to northwest, brings an unstable southwesterly with clusters of rain or showers in the west, heaviest on the coast, transferring northeastwards through the day. This will allow an afternoon improvement in the west, whilst a focus of heavy downpours and thunderstorms will affect the east and northeast.

### Headline for Eryri / Snowdonia National Park

Blustery, with some rain at times in morning, then mostly dry afternoon.

## Detailed Forecast for Monday, 27 May, 2024

<b>How windy? (On the summits)</b>	Westerly to southwesterly, 20 to 30mph with gusts on the highest ridges reaching 40mph.
<b>Effect of wind on you?</b>	<b>Walking and balance starts to be affected especially on ridges. Walking strenuous on the highest tops. Feeling chilly.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Light rain start, later only local showers.</b> Some light rain spots in the morning, those most likely in National Park area. Risk of localised showers passing eastwards, but generally improving conditions toward and into the afternoon.
<b>Cloud on the hills?</b>	<b>Morning mostly covered, later often clearing.</b> Hills often covered at start, lifting during the day, clearing most tops. Clouds may return to the hills briefly if showers occur.
<b>Chance of cloud free summits?</b>	<b>20% rising to 70%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Some sunshine through the clouds coming in the afternoon, most likely in central Wales. Good visibility if below the clouds.
<b>How Cold? (at 900m)</b>	3 to 6C. Feeling below freezing where exposed to the wind.
<b>Freezing Level</b>	Above the summits.

**Eryri / Snowdonia National Park - Looking Ahead**

	<b>Tuesday 28 May</b>	<b>Wednesday 29 May</b>
<b>How windy? (On the summits)</b>	Southwesterly 25 to 40mph	Southwesterly later northwesterly 25 to 35mph.
<b>Effect of wind on you?</b>	<b>Be prepared for very blustery or at times across western hills arduous conditions with considerable buffeting.</b>	<b>Blustery with considerable buffeting at times through the day.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Rain breaking up into heavy showers.</b> A front will progress northeast bringing periods of rain and drizzle, before tending to break up into areas of showery and at times heavy rain, risk of thunder.	<b>Clusters of showers, may ease off afternoon.</b> Clusters of rain or heavy showers edging east through morning and into early part of afternoon. Risk well inland of some downpours and a local thunderstorm. Tending to become drier from west later.
<b>Cloud on the hills?</b>	<b>Extensive, best breaks afternoon in east.</b> Cloud will shroud the hills extensively through the day, Bases to lowers slopes in the west in the morning, before slow rise. Best breaks afternoon in the east.	<b>Extensive, but gradual rise in bases.</b> Within a humid environment, expect widespread hill fog on the fells. Lowest bases in the morning, before gradual lift of the bases. Best breaks in west later.
<b>Chance of cloud free summits?</b>	<b>30%</b>	<b>20%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Often overcast, but scope for some patchy sun to break through at times, mainly across east Wales. Rather murky, with poor visibility in rain.	Often overcast, with limited patches of sun. May become sunnier W coastal hills. Visibility good, but rather murky at times in morning, and poor visibility in rain.
<b>How Cold? (at 900m)</b>	9C, but feeling close to freezing in the wind on tops.	6C
<b>Freezing Level</b>	Above the summits	Above the summits

**Planning Outlook**

**All mountain areas of Britain from Tuesday, 28 May, 2024**

Tuesday will see unsettled conditions prevail with spells of rain moving in from the southwest courtesy of a warm front. Uncertainty on northward extent, but heavy showers may develop over the Highlands. Wednesday will see frequent areas of heavy showers or local thunderstorms, western coastal hills best. Then scope for drier conditions to develop as a ridge of high pressure moves in from the west, bringing a north to northwest flow. Low cloud and drizzly showers likely NW Scotland.

**Forecast issued at 14:04 on Sunday, 26 May, 2024**

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
