General Summary for Thursday, 31 October, 2024

British Mountain Summary:

Based on forecast chart for noon 31 October, 2024

Widely murky, mostly overcast skies but dry, only in western Scotland drizzle. Mild, but severe wind make it feel cold in Scotland. Marked increase of wind speed with height in the north, severe gales over Scottish mountains. In Wales lot of sunshine above very low clouds.

Headline for Eryri / Snowdonia National Park

Murky on lower terrain, higher up clear. Dry, warm, calm

Detailed Forecast for Thursday, 31 October, 2024

How windy? (On the summits)	Variable, 15mph or less.
Effect of wind on you?	Negligible.
How wet? (Precipitation and its impact)	No rain expected
Cloud on the hills?	Extensive on lower terrain. Cloud fairly persistent in the valleys and on lower hills. Above 500m widely clear.
Chance of cloud free summits?	70%
Sunshine? Air clarity (below cloud)	Overcast and murky most or all day, but above the cloud very sunny. If not in cloud visibility excellent.
How Cold? (at 900m)	9 to 12C
Freezing Level	Above the summits.

Eryri / Snowdonia National Park - Looking Ahead

	Friday 1 November	Saturday 2 November
How windy? (On the summits)	Westerly or variable, mostly 10 to 15mph or less.	Variable, mostly southerly, 5 to 15mph.
Effect of wind on you?	Negligible.	Negligible.
How wet? (Precipitation and its impact)	Rain unlikely Isolated spots of drizzle not fully ruled out, but generally dry.	No rain expected
Cloud on the hills?	Mist in valleys, especially in the morning Low cloud may be fairly widespread in the valleys and on lower hills in the morning, later lifting to higher levels. Above 600-800m frequently clear at start, deteriorating.	High uncertainty, most likely scenario: Low cloud from lower slopes upward, lifting only a little through the day. Highest tops have chance to be above the cloud.
Chance of cloud free summits?	60%	30%
Sunshine? Air clarity (below cloud)	Often sunny above the low cloud, but murky in the valleys. Excellent visibility.	Uncertain, most likely little or no sunshine at all and poor visibility.
How Cold? (at 900m)	11C	7 to 9C
Freezing Level	Above the summits.	Above the summits.

Planning Outlook**All mountain areas of Britain from Friday, 1 November, 2024**

After wet Friday in Scotland, back to high pressure for the weekend and beginning of next week. Inversion conditions developing mean locally very misty or cloudy, and tops sometimes above cloud. Southwesterly winds, dry and mild conditions. Such scheme holds until mid next week, when a weak front passage will probably deteriorate weather for a day, at least in Scotland. Later another few days of often cloudy, but dry and warm weather. Winds may speed up again end of next week.

Forecast issued at 16:02 on Wednesday, 30 October, 2024

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2024.
