General Summary for Friday, 9 May, 2025

British Mountain Summary:

Based on forecast chart for noon 9 May, 2025

In Scotland, thin mist in the glens and isolated cloud caps over highest tops at dawn will soon clear for cloud free hills. Isolated low morning fog in eastern valleys of England and Wales as well, also soon clearing. A patchwork of sun for most as high fair-weather cloud builds, feeling warm in direct sun. Mostly light winds.

Headline for Eryri / Snowdonia National Park

Dry with patchy high cloud; feeling warm in the sun

Detailed Forecast for Friday, 9 May, 2025

How windy? (On the summits)	Generally southeasterly through variable, 10-15mph or less.
Effect of wind on you?	Small
How wet? (Precipitation and its impact)	No rain

How wet? (Precipitation and its impact)	No rain	Chance showery outbreaks Chance of showery bursts after noon.
Cloud on the hills?	Not expected	Not expected
Chance of cloud free summits?	Nearly certain	Above 90%
Sunshine? Air clarity (below cloud)	Strong sunshine, a patchwork of cloud building after noon. Some haze at dawn, visibility becoming excellent.	Sunny, some high cloud around, filling in somewhat in the afternoon. Visibility excellent.
How Cold? (at 900m)	7C from dawn, rising to 11C afternoon.	10 to 12C
Freezing Level	Above the summits	Above the summits

Planning Outlook**All mountain areas of Britain from Saturday, 10 May, 2025**

Low pressure south and west of the British Isles will facilitate bursts of rain into Wales though the weekend into next week. High pressure to the east keeps most eastern areas settled during this time. The continental wind track will keep most cloud above the summits, with eastern areas often sunny. Generally settled conditions prevail next week as high pressure reestablishes just north of the British Isles, though odd bursts of rain come and go in Wales. A mix of cloud and sun with light winds, generally easterly though variable. Slight frosts at dawn in sheltered spots, mostly warm by day. Very dry ground conditions, beware high risk of fire.

Forecast issued at 15:30 on Thursday, 8 May, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
