General Summary for Tuesday, 13 May, 2025

British Mountain Summary:

Based on forecast chart for noon 13 May, 2025

Strong warm sunshine for most places, very warm in western Scotland; beware sunburn and dehydration. Early fog draped around the north and east of Scotland and eastern Pennines, higher terrain above the fog, which will disperse back toward the North Sea coast. Gusty easterly winds England & Wales, locally southern Scotland.

Headline for Eryri / Snowdonia National Park

Sunny and warm, but breezy.

Detailed Forecast for Tuesday, 13 May, 2025

How windy? (On the summits)	Easterly 20-25mph. Some gusts over tops and down western slopes, 30-35mph at times, strongest in morning.
Effect of wind on you?	Walking becoming impeded on tops, balance challenged on exposed terrain where gusts blow.
How wet? (Precipitation and its impact)	No rain expected
Cloud on the hills?	Not expected
Chance of cloud free summits?	Practically certain
Sunshine? Air clarity (below cloud)	Widely sunny, some thin high cloud toward south. Excellent visibility though some haze at first.
How Cold? (at 900m)	10 to 12C from dawn, rising to 14C. Some local western slopes a degree or two warmer. Feeling cooler in the breeze, but offset by warm sunshine. Approaching 25C by afternoon in western valleys.
Freezing Level	Above the summits

	Wednesday 14 May	Thursday 15 May
How windy? (On the summits)	Easterly 15mph, gusts 20-25mph.	Northeasterly 15 to 20mph, gusty 25mph at times around higher summits.
Effect of wind on you?	Fairly small	Fairly small, but may affect comfortable walking and balance at times on exposed ridges, feeling rather cool.
How wet? (Precipitation and its impact)	No rain	No rain expected
Cloud on the hills?	Not expected	None expected
Chance of cloud free summits?	Above 90%	Above 90%
Sunshine? Air clarity (below cloud)	Extensive strong sunshine. Some thin high cloud may develop. Visibility excellent; slight haze lower down in the morning.	Extensive strong sunshine. Visibility excellent.
How Cold? (at 900m) Freezing Level	7C or warmer on some higher slopes from dawn (small change with height); reaching 13C afternoon. Above the summits	8 to 10C, small change all day; feeling like 2C in the breeze. Above the summits

Planning Outlook

All mountain areas of Britain from Wednesday, 14 May, 2025

High pressure persists toward the north of Britain this week and likely continuing through the weekend, bringing more dry, warm and sunny weather. East to northeasterly breezes prevail, gusty at times around some hills, mainly England and Wales. Some coastal fog and low cloud drifting inland from the North Sea will affect eastern areas in the early mornings, but largely dispersing through middle of daytimes. Highest temperatures typically toward the west. Very dry ground conditions, beware high risk of fire.

Forecast issued at 16:30 on Monday, 12 May, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
