## General Summary for Thursday, 12 June, 2025

### British Mountain Summary:

#### Based on forecast chart for noon 12 June, 2025

Strong southeasterly winds, reaching gale-force with powerful gusts over mountains and to some lower slopes. Much of the Highlands dry most of daytime, but bursts of rain develop near west coast, risk thundery later. Wales sees heavy rain and thunderstorms morning into middle of day, spreading over northern England afternoon.

### Headline for Eryri / Snowdonia National Park

Thunderstorms. Strongest winds in morning.

## Detailed Forecast for Thursday, 12 June, 2025

<b>How windy? (On the summits)</b>	Southeast then southerly, 25 to 40mph, risk gusts 50mph for a time; speeds tending to lessen into afternoon.
<b>Effect of wind on you?</b>	<b>Very blustery, walking arduous on high terrain, affecting balance on exposed tops and ridges, sudden buffeting gusts.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Thunderstorms likely soon develop</b> Sporadic bursts of rain from elevated cloud from dawn. Increasing threat during morning of widespread heavy rain developing from the south, lasting several hours, risk thunderstorms; clearing northward later in daytime to leave patchy rain, perhaps still an odd heavier shower.
<b>Cloud on the hills?</b>	<b>Lowering, varied patches in rain</b> Most cloud initially above the hills, but as rain develops, cloud soon filling in across the hills, in places patches from forest canopies upward during and after heavy bursts. May improve later in daytime.
<b>Chance of cloud free summits?</b>	<b>50%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Mainly overcast, hazy, poor visibility in rain. Some sun may break through later in the day, visibility may improve.
<b>How Cold? (at 900m)</b>	Humid 14C from dawn, but then little change; small variation with height in morning.
<b>Freezing Level</b>	Above the summits
