## General Summary for Saturday, 14 June, 2025

### British Mountain Summary:

#### Based on forecast chart for noon 14 June, 2025

Varied across Britain through the day, particularly England and Wales, where some sunshine will be interspersed with rain (including thunderstorms), low cloud and changes in wind speed and direction. Changes slower in Scotland where broadly a band of thundery rain will move northwards.

### Headline for Eryri / Snowdonia National Park

Sometimes fine: windy, sometimes low cloud, risk thunderstorm.

## Detailed Forecast for Saturday, 14 June, 2025

|   |  |
|---|--|
| <b>How windy? (On the summits)</b><br><br><b>Effect of wind on you?</b> | Southeasterly at dawn, erratically veering through morning to southwest or westerly. Generally 20 or 25 but 35mph for a few hours morning and on Snowdon range middle of day.<br><br><b>Sometimes fairly small, but particularly morning gusts winds (including on lower slopes) will make balance difficult for periods.</b>                                      |
| <b>How wet?</b><br>(Precipitation and its impact)                       | <b>Rain on and off; risk thunderstorm</b><br>Areas of thundery rain before dawn will have cleared or will soon clear. Then a mix through the day: intermittently fine but mainly west Wales, patches of rain and drizzle, including further scattered thunderstorms.   |
| <b>Cloud on the hills?</b><br><br><b>Chance of cloud free summits?</b>  | <b>Very extensive, particularly west Wales</b><br>Persistent fog across the mountains post dawn; the fog sometimes from just above the valleys upward. Will improve at times; by afternoon cloud frequently confined to highest summits east Wales, but still frequently below 500m west Wales - and sometimes much lower Snowdon to Llyn peninsula.<br><b>20%</b> |
| <b>Sunshine?</b><br>Air clarity (below cloud)                           | Patchy sunshine, mainly east Wales afternoon.<br>Visibility very good but in W Wales very hazy.  |
| <b>How Cold? (at 900m)</b><br><br><b>Freezing Level</b>                 | 9C<br><br>Above the summits  |

|   | Sunday 15 June   | Monday 16 June   |
|---|--|--|
| <b>How windy? (On the summits)</b>                | Westerly, 25mph.   | Between southwest and west; 15 or 20mph.   |
| <b>Effect of wind on you?</b>                     | <b>Fairly small</b>  | <b>Small</b>   |
| <b>How wet?</b><br>(Precipitation and its impact) | <b>Drizzly rain, mainly toward coast</b><br>Risk occasional drizzly rain western mountains.<br>Total rainfall small.<br>Elsewhere, drizzly showers, if any, rare.  | <b>Rain unlikely</b><br>Possibly pockets fine drizzle slopes close to southwest facing coasts.   |
| <b>Cloud on the hills?</b>                        | <b>Unlikely to clear most summits all day; cloud base low near coast</b><br>Within 10 miles of so of the general lie of the west coast: cloud base sometimes sometimes 300m most often 500 or 600m - but may clear above 800m for a few hours middle of da.<br>Further inland; cloud base will tend to rise, by afternoon mostly above 750m. | <b>Persistent near some coasts; cloud base rising to or above higher tops</b><br>Cader Idris north to areas between Lleyn peninsula and Snowdon : Hills foggy most or all day, the cloud base typically 450m late morning, perhaps 600m at times.<br>Elsewhere: cloud base rising to 800 to 1000m. |
| <b>Chance of cloud free summits?</b>              | <b>30%</b>   | <b>60% afternoon</b>   |
| <b>Sunshine?</b><br>Air clarity (below cloud)     | Patches of sun mainly well inland.<br>Frequently very good or excellent visibility, but perhaps sometimes misty near the coast.  | Patchwork of sunshine and very good visibility - but often dull and sometimes misty toward the coast near Lleyn peninsula.   |
| <b>How Cold? (at 900m)</b>                        | 9C   | 11 to 14C warmest east Wales afternoon.  |
| <b>Freezing Level</b>                             | Above the summits.   | Above the summits.   |

## Planning Outlook

### All mountain areas of Britain from Sunday, 15 June, 2025

Colder air from the west will reach all areas by Sunday. However, low cloud still extensive on western mountains, together with drizzly showers. Little rainfall most of next week and increasingly warm, although western Scotland colder with occasional rain as weakening fronts affect particularly the NW Highlands. By mid week it should be fine everywhere - although it may not last into the following weekend.

### Forecast issued at 16:12 on Friday, 13 June, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
