## General Summary for Saturday, 30 August, 2025

### British Mountain Summary:

#### Based on forecast chart for noon 30 August, 2025

Fine conditions in the morning for many, lasting well into the afternoon north and eastern Scotland, but southerly winds will be strengthening, to gale force soonest near to western coasts. Heavy rain sweeps in from the southwest, some thundery bursts mixed in. Deteriorating sooner in Wales.

### Headline for Eryri / Snowdonia National Park

Wind rapidly increasing, heavy rain and gales.

## Detailed Forecast for Saturday, 30 August, 2025

<b>How windy? (On the summits)</b>	Southerly soon 30mph morning, rising to 60mph gusts 70mph middle of day. Later west-southwesterly 45-60mph.
<b>Effect of wind on you?</b>	<b>Deteriorating; walking rapidly becoming difficult, severe conditions for a time on higher terrain. Significant wind chill.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Heavy rain sets in during morning-middle of day; clearing later in day</b> Largely dry dawn, lasting longest further east, but rain sets in widely from west during morning, increasingly heavy with a risk of torrential downpours middle of day into afternoon, chance of thunder. Tending to break into showers later afternoon, drier into evening, but a few showers remain in west.
<b>Cloud on the hills?</b>	<b>Extensive, breaking somewhat after rain</b> Varied cloud banks from dawn mostly in west, lifting for a time in morning, but filling in more extensively as rain sets in, covering hills from lower slopes up near coast, extensive above 600m inland. Late in day, as rain clears, cloud starting to lift and break.
<b>Chance of cloud free summits?</b>	<b>30%, then almost nil in rain.</b>
<b>Sunshine?</b> Air clarity (below cloud)	Weak sun at dawn soon gives way to thickening high cloud, soon overcast. Visibility initially good, becoming poor in rain; may improve late in day.
<b>How Cold? (at 900m)</b>	9C, rising in middle of day to 12C; cooling again later. Feeling below freezing in direct wind.
<b>Freezing Level</b>	Above the summits

**All mountain areas of Britain from Sunday, 31 August, 2025**

Low pressure continues to dominate early in the new week, maintaining unsettled conditions widely. Areas of rain and heavy showers, risk of hail and thunder. Windy, gales over mountains early in the week, tending to ease for periods at least in the Highlands mid-late week, whilst southwesterlies often remain strong over England and Wales. Some improvement possible toward next weekend, though the extended outlook into the second week of September remains changeable. Mid-September shows signs of a better improvement as pressure tends to rise more widely.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
