General Summary for Thursday, 2 October, 2025

British Mountain Summary:

Based on forecast chart for noon 2 October, 2025

A persistently wet day for western Scotland, increasingly sustained heavy falls setting in. Southerly winds strengthen to become widely gale force over the mountains afternoon into evening. Small amounts of rain elsewhere, but drizzly for all. Low cloud blanketing hills, highest bases north of major hill groups.

Headline for Eryri / Snowdonia National Park

Wind strengthening to gales later. Drizzly rain and low cloud.

Detailed Forecast for Thursday, 2 October, 2025

How windy? (On the summits)	Southerly 25 to 40mph, strongest into the afternoon, later reaching 50mph over tops, then 60-70mph by evening.
Effect of wind on you?	Arduous conditions with a turbulent and gusty southerly wind. Conditions becoming difficult, deteriorating later to severe.
How wet? (Precipitation and its impact)	Frequent drizzle, wetter by evening A damp day with frequent drizzly outbreaks. Steadier then heavier rain setting in later in the day into the evening and overnight.
Cloud on the hills?	Extensive, breaks in the north. Cloud covering the hills most or all day. Bases varying but around 500-700m on the west coast, but inland rising to 700-900m, highest north of the A5.
Chance of cloud free summits?	20% west, to 40% north/eastern tops.
Sunshine? Air clarity (below cloud)	Glimpses of sun will be very fleeting and mainly in the east. Visibility sometimes poor due to drizzle.
How Cold? (at 900m)	9C, fairly humid air, but feeling closer to freezing in stronger winds.
Freezing Level	Above the summits

All mountain areas of Britain from Friday, 3 October, 2025

Mild and humid southwesterlies bring prolonged heavy rain to western Scotland late this week where streams will be fast-flowing, flooding developing. Wet underfoot most western areas. A couple of fast-moving low pressure systems late this week - gales increasingly during Thursday, then after a brief lull early Friday, a more intense system bringing increasingly stormy conditions by later Friday, continuing into Saturday. Dropping much cooler during Saturday, to freezing on higher Scottish summits. Showery and windy conditions easing only gradually into Sunday. Changeable westerlies continue next week for Scotland, high pressure builds at times further south.

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
