## General Summary for Tuesday, 7 October, 2025

### British Mountain Summary:

#### Based on forecast chart for noon 7 October, 2025

A swathe of fairly persistent rain and drizzle drifts gradually southwards over Scotland into northern England, some heavier pulses of rain. Brighter skies follow across the Highlands from the northwest, cloud base rising, brief showers. Wales has low cloud and drizzle in west. Gusty southwesterlies.

### Headline for Eryri / Snowdonia National Park

Windy, gusts near-gale force. Drizzle, low cloud west, wetter later.

## Detailed Forecast for Tuesday, 7 October, 2025

<b>How windy? (On the summits)</b>	Southwesterly 25 to 35mph, very gusty in places on tops and ridges, locally also passes, speeds likely to vary during day, occasional 40mph high tops.
<b>Effect of wind on you?</b>	<b>Buffeting gusty winds will make walking strenuous in exposure and affect balance, but in places at times smaller effects.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Drizzle, steadier rain later in day</b> Small amounts of rain in total, but often feeling damp across the hills, some periods of constant drizzle over western slopes. Late in the day, more persistent and steadier rain developing from north.
<b>Cloud on the hills?</b>	<b>Extensive, lowest west, some breaks east</b> Shrouding the mountains widely above 400-600m in western areas, to some lower slopes on Llyn peninsula and west coast. Higher bases above 600-700m toward and north of Ogwen, also Berwyn group.
<b>Chance of cloud free summits?</b>	<b>20%, to 50% eastern mid-Wales.</b>
<b>Sunshine?</b> Air clarity (below cloud)	Largely cloudy, often dull western areas, hazy at best. Locally brighter east Wales, better visibility.
<b>How Cold? (at 900m)</b>	7 or 8C, little change all day, then into night dropping to 4C. Directly in the wind feeling near/below 0C.
<b>Freezing Level</b>	Above the summits

## Eryri / Snowdonia National Park - Looking Ahead

	Wednesday 8 October	Thursday 9 October
<b>How windy? (On the summits)</b>	Northwest later westerly 15 to 20mph, occasionally 25mph higher tops.	Westerly 20 to 30mph, strongest sustained speeds higher tops in north, gusty through passes and locally downslope.
<b>Effect of wind on you?</b>	<b>Fairly small, but feeling blustery in places on exposed tops, may start to affect balance on ridges. Feeling cool.</b>	<b>Blustery over the hills, gusts affecting balance in exposure over tops and ridges. Feeling cool.</b>
<b>How wet?</b> (Precipitation and its impact)	<b>Little or no rain</b> A little rain possible from dawn as remnants of a front clears southwards. Then largely dry, bar an odd brief drizzly shower.	<b>Some drizzle</b> Drizzle most frequent west-facing coastal slopes, but in the air at times further inland, less toward east Wales.
<b>Cloud on the hills?</b>	<b>Mostly high tops with some breaks</b>  Varied banks of cloud over the hills from dawn, soon mostly confined to upper slopes. Patches may come and go above 700-900m, but good breaks likely for periods to the tops.	<b>Extensive, lowest west</b>  Covering the hills most likely all day, above 500-600m western areas, or to some lower slopes nearest coast. Base higher further inland, best chance of lifting above tops will be in Berwyn group.
<b>Chance of cloud free summits?</b>	<b>50%</b>	<b>10%</b>
<b>Sunshine?</b> Air clarity (below cloud)	Early cloud breaks to give occasional sun. Good visibility some haze.	Rare moments of sun through the cloud. Hazy below cloud, visibility reduced to poor in drizzle.
<b>How Cold? (at 900m)</b>	4 or 5C. Feeling below freezing in the wind.	7 or 8C, little change all day. Feeling near/below freezing in the wind.
<b>Freezing Level</b>	Above the summits	Above the summits

## Planning Outlook

## All mountain areas of Britain from Wednesday, 8 October, 2025

Strong westerly winds prevail into the second half of this week, gale-force over Scottish mountains; prepare for considerable chill factor. Drizzly rain and low cloud most persistent western areas. Pressure gradually rises from the south, improving conditions toward the weekend as wind drops lighter, most places become dry and cloud tends to break. Northwest Scotland likely to hold on to stronger winds, cloud and some drizzle into Saturday. Scope for inversion conditions to develop with some valley fog and varied low cloud. Settled weather is likely to continue into next week, with pleasant days and cool nights.

## Forecast issued at 16:30 on Monday, 6 October, 2025

Forecasts are issued daily by 16:30 and are kept under review and amended as necessary. However, expected conditions can still change after issue. © Copyright Mountain Weather Information Service, 2025.
